

2.5.3 IT integration and reforms in the examination procedures and processes (continuous internal assessment and end-semester assessment) have brought in considerable improvement in examination management system of the institution

Response:

During the academic year, the Institute has initiated the process of procuring the software for IT integration and reforms in the examination procedures and processes. From the next academic year (2022-23), the entire process of examination (continuous internal assessment and end-semester assessment) will go through IT integration. Currently it is partly manual and partly IT integrated. Currently, all communications related to written exam like request for setting question papers, collection of question papers, allocation of invigilators, informing examination schedule to teachers and students, hall-ticket generation, entry of marks, declaration of the results are done utilizing the existing IT services. Internal assessments carried out by using assignments, presentations, examinations, quiz, etc are collected from the teachers throughout the semester at periodic intervals. Collection of grades from evaluation committee members, compilation, averaging and integration into the grade sheets are done utilizing the IT platform. Computations of the grades for internal and semester-end assessment and their integration into the grade sheets are done using IT facilities.
