About IIPS

The International Institute for Population Sciences (IIPS), Mumbai, formerly known as the Demographic Training and Research Centre (DTRC) till 1970, was established in July 1956 under the joint sponsorship of Sir Dorabji Tata Trust, the Government of India and the United Nations. It serves as a regional centre for Training and Research in Population Studies for the ESCAP region. The Institute was re-designated to its present title in 1985 to facilitate the expansion of its academic activities. It was declared as a 'Deemed to be University' on August 14, 1985, under Section 3 of the UGC Act, 1956 by the Ministry of Human Resource Development, Government of India. The recognition has facilitated the award of recognized degrees by the Institute itself and paved the way for further expansion of the Institute as an academic institution. In 2006, the Institute celebrated its Golden Jubilee. IIPS holds a unique position among all the regional population centres. It was the first such centre started, and it serves a much larger population than any of the other regional centres. The Institute is under the administrative control of the Ministry of Health and Family Welfare, Government of India. There are seven Academic Departments in the Institute. The faculty members and the supporting staff belong to a diverse interdisciplinary background with specialization in some core areas of population sciences, trained in India or abroad. The Institute is the hub of a population and health-related teaching and research in India, playing a vital role for planning and development of the country. During the past years, students from different countries of Asia and the Pacific region, Africa and North America have trained at the Institute. The alumni are occupying prestigious positions at national and international organisations, universities and colleges, and reputed non-governmental organisations. Besides teaching and research activities, the Institute also provides consultancy to the Government and Non-Governmental organizations and other academic institutions. During the last six decades, the Institute has organized many seminar and conferences of National and International level in the field of population studies which are of worldwide importance. Institute had conducted many prime surveys like National Family Health Survey (NFHS), District Level Household Survey (DLHS), Assessment of National Rural Health Mission (NRHM), YOUTH in India Project, Global Adult Tobacco Survey (GATS India Project), Research Intervention on Sexual Health Theory to Action (RISHTA Project), and Nutrition Surveys and Longitudinal Aging Study in India (LASI).

Course content

Overview of Qualitative Research: Definition, Purpose, Scope of Qualitative Research; Difference between Qualitative & Quantitative Research; Qualitative Research Approaches; Sample Size & Sampling Methods for Qualitative Research

Designing Qualitative Research Tools / Guidelines; Data Collection Techniques; Data Documentation & Management; Ensuring quality of qualitative data. Ethical considerations in Qualitative Research

Qualitative data collection techniques: In-depth Techniques (Focus group discussion, In-depth interview, Key informant interview & Case Study); Systematic techniques (Free listing, Pile sorts, Delphi techniques); Participatory Techniques (Participatory Rapid Appraisal, Focused Ethnographic Studies, Social Mapping, Body Mapping); Observation: Participant & Non-participant; Vignettes; Mystery Client; Content analysis; Social network analysis.

Qualitative content Analysis-Coding, Social network analysis. Analysis of Qualitative data using software packages Anthropic, NVivo & Atlas.ti with hands on practice

Writing report/article based on qualitative data

(स्थापना/ Established in 1956)
बेहतर भविष्य के लिए क्षमता निर्माण
Capacity Building for a Better Future

Objectives and Outcomes of the workshop

- Discover the nature and application of qualitative research in health and demographic research
- Conceptualise qualitative research and formulate problem statements and research questions
- Study qualitative approaches and design a qualitative study
- Know qualitative data collection techniques and management
- Analyse qualitative data using Anthropac, NVivo and Atlas.ti
- Write article/report based on a qualitative study

Who should apply

This workshop is envisaged for researchers in the field of social sciences who are interested in gaining insights into the various tools and techniques of Qualitative Research Methods and its applications in the field of demographic and health research. However, preference would be given to early career researchers/PhD Scholars.

Registrations & Course fee: INR 3000/-

Certificate :

Certificate will be given to the participants after successfully completing the course

Travel award

Some participants may be provided full/partial travel awards to cover (travel, accommodation (sharing basis) and food during workshop days)
