Jointly organizes One Day Workshop  
on

# “ Harmonization of Ageing Data around the World ”

**ON 07TH NOVEMBER 2022 AT IIPS, MUMBAI**

---

As the global ageing population increases rapidly, there will be much-needed studies to examine the emerging ageing scenarios across the countries. There are more than 47 countries around the globe, which have undertaken comparable Health and Retirement Surveys (HRS), including the Longitudinal Ageing Study in India (LASI).

The Gateway to Global Aging Data (<https://g2aging.org>) is a platform for population survey data on ageing around the globe. The Gateway has done harmonization of LASI, HRS, MHAS, ELSA, SHARE, CHARLS, KLoSA, JSTAR, TILDA, MARS and CRELES datasets, with which researchers can undertake comparable studies across countries.

This workshop aims to enhance the researchers' capability to utilize harmonized HRS-family datasets around the globe by providing them hands on training to make use of comparable ageing data for their research.
