International Institute for Population Sciences

Deonar, Mumbai – 400 088

<https://www.iipsindia.ac.in/>

Objectives of the Seminar

In most parts of the world, the average life expectancy has increased, infant and child mortality rates have declined, and the proportion of malnourished children has decreased over the past decades. Many infectious diseases have receded, owing to improved sanitation, safe drinking water, nutrition, and vaccines. Despite undoubted health advances in many areas, poor health continues to be a constraint on developmental efforts in many developing countries, and India is no exception to this. As a result of economic and social upheaval, environmental degradation, and increasing inequities, human health suffers, particularly that of women and children.

Health has become a central concern in development, both as a contributor to, and an indicator of, sustainable development. Many of the key determinants of health and disease lie outside the direct control of the health sector such as environment, water and sanitation, education, employment, urban and rural livelihoods, and food security. Addressing the underlying determinants of health is key to ensuring sustainable development. It is also widely accepted that sustainable development and public health are intricately connected and closely interrelated. Sustainable development cannot occur in countries and regions marked by persistent socio-economic inequalities, widespread diseases and environmental degradation. This seminar explores the interlinkages between population, health and sustainable development, as well as the strategies and measures to achieve the sustainable development goals.

Themes of Technical Sessions

- Sustainable Development Goals (SDGs)
- Health Systems and Reforms
- Health Policies and Programs
- Marriage and Dissolution
- Health Expenditure and Health Care Financing
- Migration, Urbanization, and Remittances
- Ageing and Socio-economic and Health Implications
- Health, Economic, and Social Effects of COVID-19 Pandemic
- Data Quality
- Nutrition and Food Security
- Gender Inequalities: Drivers and Impacts
- Sexual and Reproductive Health of Adolescents and Youth
- Education and Human Capital
- Covid-19 and Widening Inequalities
- Fertility: Preferences and Intentions
- Demographic Dividend and Development
- Demographic Trends: Estimates and Projections
- Human Mobility and Environment

INFORMATION FOR PAPER PRESENTERS

Individuals who are working or doing research in population, health and development sectors are invited to submit their research papers. Authors are requested to submit both: a) an abstract (300 words); and b) either an extended abstract (2-4 pages, including tables) or a completed paper. Extended abstracts must be sufficiently detailed enough to allow the organizers to judge the merits of the paper. IIPS is looking forward to the participation of population experts, social scientists, and health professionals in this virtual scientific seminar. Apart from Technical Sessions, Plenary Sessions will also be organized. We welcome your submissions using the following link: <https://iipsindia.ac.in/content/iips-annual-seminar>. Your submitted abstracts can be edited/modified till 31 January 2022.

For any queries, email to: iipsseminar2022@iipsindia.ac.in

About the Institute

The International Institute for Populations Sciences (IIPS), formerly known as DTRC, established in July 1956 under the joint sponsorship of The United Nations, The Government of India, and Sir Dorabji Tata Trust. The Institute is an autonomous organization of the Ministry of Health and Family Welfare, Government of India. During the past 65 years, IIPS trained and awarded degrees to students from 42 countries of the ESCAP region. The Institute has post-graduation, doctoral and post-doctoral programmes. Alumni of the Institute, now occupy key positions in the field of Population and Health in governments of various countries, Universities and Research Institutes as well as in reputed National and International organizations. IIPS undertakes scientific research on population and health issues that are of importance to India and other countries through nation-wide, large-scale, sample surveys at regular intervals. State and district-level data from the surveys of IIPS is used for planning and development of the country. Besides teaching and research activities, the Institute also provides services of evaluation, training and consultation to the Government and international organizations. Faculty at the Institute, belongs to diverse interdisciplinary background, undertake innovative research that connects demography with social, economic, health and developmental aspects. IIPS faculty's cutting edge research has been published in top class journals around the world.

IIPS Teaching and Research Programmes

The Institute is the hub of population and health related teaching and research in India, playing a vital role for planning and development of the country. IIPS offers Master of Arts/Science in Population Studies (M.A./M.Sc.), Master of Science in Biostatistics and Demography (MBD), Master of Population Studies (MPS), PhD and Post-Doctoral programmes. Apart from these programmes, the Institute also offers Master of Arts in Population Studies through distance learning mode. The Institute also conducts short-term courses from time-to-time for various organizations on population and health issues. Please visit our website for details of the courses and training programmes.

New Academic and Administrative Building of IIPS (under-construction)

Seminar Co-ordinators:

- Prof. K.S. James
- Prof. Usha Ram
- Dr. Kaushlendra Kumar
- Prof. T.V. Sekher
- Dr. Harihar Sahoo
- Dr. Suresh Jungari
