Meeting number: 2642 491 8375 | Password: 123456

Dr. Jinkook Lee is a research professor of Economics and the Program Director of Global Aging, Health, and Policy at the Center for Economic & Social Research, University of Southern California. Her research interests include the economics of aging, centered around late-life cognition and dementia and their risk factors, health disparities across socioeconomic status and by gender, and cross-country differences in late-life health and wellbeing. She has led the development of an international data harmonization project, the Gateway to Global Aging Data (g2aging.org), which is a platform for population survey data on aging from 47 countries around the world. She has co-led the development and implementation of the Longitudinal Aging Study in India (LASI) and is the principal investigator of the Harmonized Diagnostic Assessment of Dementia for the Longitudinal Aging Study in India, an interdisciplinary project on dementia and cognitive aging. She currently serves on the advisory panels of population surveys in England, Ireland, Switzerland, China, Japan, Malaysia, Nepal, Egypt, Malawi, and Kenya. She also serves on the editorial boards for the Journal of Economics of Aging and the Journal of Aging and Social Policy and provides scientific advice and information for the World Health Organization, the OECD and the World Bank. She previously held a professorship at Ohio State University and the Pardee RAND Graduate School and has been a faculty scholar at the Federal Reserve Board. She received her Ph.D. in family economics from Ohio State University and her B.S. from Seoul National University.

Professor Chidambara Chandrasekaran (1911-2000), known as the doyen of demography in India, was the Director of International Institute for Population Sciences (then DTRC) from 1959 to 1965. Prof. Chandrasekaran obtained his Ph.D. in Statistics from University of London in 1938. He also studied at the School of Hygiene and Public Health, Johns Hopkins University, USA. Prof. Chandrasekaran served as Population Adviser at ESCAP, Bangkok, and was associated with the World Bank and UNFPA as a Population Specialist. He was the President of the International Union for the Scientific Study of Population (IUSSP) during 1969 to 1973. He along with Prof. W. E Deming developed the well-known Chandra-Deming formula to provide better estimates of vital events. This technique based on the dual record system was an innovation which is continuously being used by the Sample Registration System, India for collecting vital events. Prof. Chandrasekaran was instrumental in initiating and conducting the well-known Mysore Population Study in the early fifties, which was jointly undertaken by the Government of India and the United Nations. His autobiography -*The Life and Works of a Demographer*- was published in 1999.

Organizers:

Prof. T.V. Sekher & Dr. Dipti Govil
