

**MINUTES OF THE MEETING OF THE ACADEMIC COUNCIL OF THE
INTERNATIONAL INSTITUTE FOR POPULATION SCIENCES
HELD ON DECEMBER 13, 2023.**

The meeting of the Academic Council was held under the chairpersonship of Prof S.K Singh, Director (Additional Charge) on December 13, 2023 at 10.30 AM at Seminar Hall ,IIPS-Mumbai. At the outset, the Chairperson extended warm welcome to all members and external experts to the meeting of Academic Council.

The list of members attended the meeting is given in Annexure I

Chairperson of Academic Council requested Prof. D.A.Nagdeve, Member-Secretary to proceed with the agenda.

Agenda Item No.1: To confirm the Minutes of Academic Council Meeting held on July 05, 2023.

The members confirmed and approved the minutes of the meeting of Academic Council held on July 05, 2023.

Agenda Item No.2: Action taken on the Minutes of Academic Council Meeting held on July 05, 2023.

Action taken were noted.

Agenda Item No.3: To discuss & approve the admission criteria of Master of Science (M.Sc.) in Survey Research and Data Analytics.

The Director (Additional charge) has constituted a committee for the admission criteria of Master of Science (M.Sc.) in Survey Research and Data Analytics.

Dr.Preeti Dhillion, member of the committee , made a presentation on the eligibility criteria. The committee has recommended to the follow the same admission procedure & fees structure like other master degree programme of the Institute.

The members of Academic Council approved the approve the admission criteria of Master of Science (M.Sc.) in Survey Research and Data Analytics. **Annexure II**

Agenda Item No.4: To approve the syllabus of Master of Science (M.Sc.) in Survey Research and Data Analytics.

The Director & Sr. Professor constituted a committee for frame the syllabus of Master of Science (M.Sc.) in Survey Research and Data Analytics. Dr.Preeti Dhillion, Member Secretary of the committee , presented in detailed the syllabus of M.Sc. in Survey Research and Data Analytics course. Dr.Dhillion has displayed the semester wise credit distribution and also enlighten the elective papers ,field work & internship .

Chairperson has suggested to constitute a committee with course coordinator for the evaluation process of Internship /field work. The Placement cell must ensure the internship of students.

The members of Academic Council approved the syllabus for Master of Science (M.Sc.) in Survey Research and Data Analytics. w.e.f AY 2024-25. **Annexure III**

Agenda Item No.5: To discuss and approve the revised admission eligibility criteria for Fulltime & Part time Ph.D Programme in line with UGC.

The Director (Additional charge) has constituted a committee for revised the admission eligibility criteria for full-time & Part-time Ph.D programme in line with the UGC guideline.

Prof.Abhishek Singh, Member Secretary of the committee , made a presentation on the eligibility criteria. He has briefed about the recommendation of the committee & enlighten the new Ph.D eligibility criteria and admission procedure in line with the UGC regulation.To ensure the quality of Ph.D degree, he also added that the committee propose publication is essential for the award of Ph.D degree.

The member of AC has recommended the followings :-

- Ph.D admission will be in two stage process namely 1.Entrance Test /CBT (weightage 70%)2.Interview (weightage 30%). Part-time Ph.D admission procedure will be the same as regular Ph.D admission.
- Course work is mandatory for M.Phil degree holder and no course work exemption will be granted under any circumstances.
- AC recommended to add one external member in the personal interview in Ph.D admission process from the academic year 2024-25 onwards.
- In case of superannuation or resignation of Guide, the advisory committee members will authorize to signature on half yearly progress report or any others documents required day to day basis.

The members of Academic Council approved the revised Ph.D guideline. **Annexure IV**

Agenda Item No.6: To discuss & approve the admission procedure, fee & course structure of 4 years Bachelor course in Population Studies (Honours with Research) as per NEP-2020.

Prof. Aparajita Chattopadhyaya, Chairperson of the NEP Committee has informed the AC that the committee has prepared the programme structure in the line with NEP-2020. The name of proposed courses shall be 1] Bachelor of Science in Population Sciences [Honours with research or Honours] (2] Bachelor of Science in Statistics[Honours with research or Honours] 3] Bachelor of Science in Population Health [Honours with research or Honours]. The commencement of the courses is proposed from the Academic Year 2025-2026 through Central University Entrance Test(CUET) managed by the National Testing Agency.The committee also recommended to extend the course upto fifth year (Master degree) as per NEP-2020.

Dr. Srinivas Goli has made brief presentation on the proposed programme namely Bachelor of Science in Population Sciences .Dr. Kunal Kesari has presented Bachelor of Science in Population Health and Prof. Nandita Saikia has made brief presentation on the proposed programme namely Bachelor of Science in Statistics.

Assistant Registrar (Acad.), Member Secretary of the committee informed the AC that the committee has recommended the fee structure same as master degree programmed currently running at the Institute. At the time of recommendation, it was also mentioned that the committee has recommended the fee structure keeping in the mind with multiple entry, exit and re-entry points.

The members of Academic Council approved the proposed course structure & fees of the above the three programme. **Annexure V**

Agenda Item No.7: To discuss & approve the structure of the Master of Arts in Population Studies programme, offered through the distance learning.

The Director & Sr. Professor, has constituted a committee to prepare structure of course namely the Master of Arts in Population Studies offered through mode. Prof. T. V. Sekher, Chairperson of the Committee has presented the detailed recommendation of the committee. He has informed that the weightage of semester end examination and internal assessment should be 70%, 30% respectively. The AC recommended that in case of Term Paper only secondary data to be considered.

Chairperson has recommended to develop the modules as per the revised syllabus with immediate effects.

The member of Academic Council approved the same.

Agenda Item No. 8: Ph.D Re-registration of Mr.Kisan Dilip Algur.

Prof. D. A. Nagdeve, Ph.D coordinator informed that a committee with an external member review the progress of Mr.Kisan Dilip Algur & recommended to submit the thesis within one year.

The member of Academic Council approved the same.

Agenda Item No.9: Review the progress of internally and externally funded research projects of the Institute.**Internal Projects (Ongoing)**

Sr. No.	Project Name	Co-ordinators	Start Date	Completion Date	Status
1	Longitudinal study of Maternal and Infant Nutrition in Maharashtra (LoSMINM)	Dr. L.K Dwivedi, Dr.Dilip T.R Dr. Sarang P, Dr. Preeti Dhillion Dr. R.S. Reshmi. Dr.Suresh Jungari Mr.Anjani Kumar Mishra DHO of Raigarh District	Jan-21	Mar-24	Noted
2	Estimation of child mortality and immunization coverage at district level in India, An application of small area estimation techniques	Dr. L.K. Dwivedi	April-21	Mar-24	Noted
3	Projection of Annual cancer Incidence at district level by quinquennial age group and sex from 2021 to 2031 in Maharashtra	Dr.Murali Dhar, Dr.Atul Budukh.	Jan-22	Oct-24	Noted
4	Cost of treating Gastrointestinal cancer and the burden of treatment on patient's household	Dr. Dilip T.R. Dr. Shailesh Shrikhande & Dr. Manish Bhandare.	Sep-21	March-24	Noted
5	Small estimates of Covid 19 disease in India: What we missed	Dr. Suryakant Yadav Dr. Dilip T.R	June-21	March-24	Noted
6	A study on marriage and dissolution pattern in India	Dr.D.A. Nagdeve, Dr.C. Shekhar, Dr.M. Alagrajan, Dr.H.Sahoo, Dr.Srinivas Goli,Dr.M R Pradhan	May - 22	Dec - 23	Noted
7	An assessment of Civil Registration System in India	Dr.Nandita Saikia, Dr.T R Dilip and Dr.Kauslendra Kumar	Aug-22	Jan-24	Approve extension upto March 24.
8	Estimation mortality indicators for North Eastern Region of India based on recent survey data (NSSO and NFHS)	Dr.H. Lhungdim, Dr.Abhishek Singh, Dr.Dhananjay Bansod, Dr. Nandita Saikia, Dr.Kaushalendra Kumar, Dr.Suresh Jungari	Oct -22	March -24	Noted
9	A study of Migrants in Mumbai	Dr.Sunil Sarode, Dr.Archana Roy, Dr.Suresh Jungari, Dr.Kunal Keshri	April-23	Sep-25	Noted

	agglomeration from within Maharashtra				
10	famTRANS - Families in Transition	Dr. Srinivas Goli, Dr. T.V.Sekher, Sabu S. Padmadas(University of Southampton), Vegard Skribekk(Columbia Aging Center) Ishita Chatterjee (UWA Business School)	April -23	Sept-24	Noted
11	Consequences of male Migration on left -behind women, children and elderly parents in Kerala and Middle Ganga Plain: Differentials and Determinants	Dr.Archana K Roy, Dr.Dipti Govil, Dr.Suryakant Yadav and Dr.KC Das	April-23	Sept-24	Noted
12	The Effect of Resettlement on Livelihood Rebuilding, Women Health and Demographic Behaviour: The Study of Indira Sagar Irrigation Project in Bhandara District of Maharashtra	Dr. D. A. Nagdeve	April-23	March-24	Noted

External Projects (Ongoing)

Sr. No.	Project Name	Coordinators	Start Date	Completion Date	Status
1	Global Youth Tobacco Survey-4	Dr.H.Lhungdim, Dr.R.Nagarajan Dr.Murali Dhar	Apr-18	Jun-23	Completed
2	State of India's children report - SOICR	Dr. S. Goli	Aug-22	Aug-23	Completed
3	Gender Equity and Health (GEH Project (2017-27)	Dr.Abhishek Singh Dr.Kaushalendra Kumar	Nov-18	Oct-27	Noted.
4	Study of Global Ageing and Adult Health (SAGE)- India, Wave-3, 2019-23	Dr.T.V. Sekher, Dr. Murali Dhar Dr.Archana K. Roy	Jun-19	Dec -23	Noted.
5	Exemplars in Maternal & New born Mortality Reduction in India.	Dr.Usha Ram, Dr.Manoj Alagarajan,	May-21	May-23	Approve extension upto March - 24
6	Integrating Ageing Research with Policy and Programmes in India	Dr.D Govil, Dr. H Sahoo	Aug-21	June-23	Approve extension upto March - 24.

7	Longitudinal Ageing Study in India (LASI) Main Wave 2 (2023-25)	Dr.T.V. Sekher, Dr.Chander Shekhar, Dr.R. Nagarajan, Dr.Aparajita Chattopadhyay, Dr. Dipti Govil Dr.Sarang Pedgaonkar	April-23	Dec-25	Noted. (Wave -II)
8	South Asia Centre for Labour Mobility and Migrants (SALAM) Funded by ILO, IOM And UN Women	Dr.R.B.Bhagat, Dr.K.C.Das Dr.Reshmi, R.S.	Oct- 21	Nov- 23	Completed.
9	National Family Health Survey-6	Dr.S.K. Singh, Dr.H. Lhungdim Dr.Abhishek Singh, Dr.Dhananjay Bansod, Dr.L.K Dwivedi, Dr.Harihar Sahoo Dr.Sarang Pedgaonkar, Dr.Preeti Dhillon, Dr.Reshmi R. S.	Jan-23	Dec -25	Noted.
10	IFPRI-International Food Policy research institute (POSHAN) Project	Dr. S.K. Singh Dr.L.K Dwivedi, Dr.Sarang Pedgaonkar	Jun -23	May- 24	Noted.
11	Small area estimates of hypertension and Diabetes in India	Dr Suryakant Yadav Dr Solveing A. Cunningham, Dr Waller Lance (Emory University), Dr Siddharta Mandal, Dr Dimple Kondal	Dec-22	July 24	Noted
12	The Harmonised Diagnostic Assessment of Dementia for the Longitudinal Aging Study in India (LASI- DAD Study) (2019-2025) in collaboration with University of Southern California and All India Institute of Medical Sciences.	Dr.T.V.Sekher Dr. Sarang Pedgaonkar	Jan- 19	Aug 25	Noted.
13	R4D India (LASI-VIS Study)	Prof. S.K.Mohanty Dr. Sarang Pedgaonkar	Feb-21	June-23	Completed
14	Provision of Technical support for Implementation of STEP survey in Timor-Leste"	Prof. Udaya S Mishra	Feb-23	Nov-23	Noted.
15	Support for a survey on the availability and readiness of health	Prof. U.S. Mishra Dr. T.R. Dilip	Feb-23	Nov-23	

	facilities to provide non communicable disease-related care as a part of the STEPs Survey in Timor-Leste				Noted.
16	The impact of lifestyle habits and disaster on the health of the tribal population in eastern area	Prof. Nandita Saikia	Aug-22	July-24	Noted.
17	Global Adult Tobacco Survey-3	Dr.R. Nagarajan, Dr.Murali Dhar, Dr.Nandita Saikia, Dr.Dilip TR, Dr.Manas Pradhan, Dr. Pradeep Salve	Nov-21	June -25	Noted.
18	Young Wives: An exploratory study of married women below twenty and the socio-cultural determinants of their contraceptive behavior in low resource setting in India	Dr. S.K. Singh	March -23	Jan-24	Noted.

Agenda Item No.9: New Projects Proposal.

Internal New (Projects Proposal):

Sr. No.	Project Name	Coordinators	Status
1	Environment and health of older adults in India: An examination of population data with gridded pixel environment data	Prof. Aparajita Chattopadhyay Prof. TV Sekher	Approve
2	Occupational Mobility and Employment Pattern in India	Prof.Sanjay K Mohanty	Approve
3	Global burden of causes of death in seven regions of world with a focus on South Asia (India), East Asia, USA, UK and High-Income countries.	Dr. Suryakant Yadav Prof. U.S. Mishra Dr. T.R. Dilip	Approve

External New (Projects Proposal):

Sr. No.	Project Name	Coordinators	Status
1	SAHELI: Study and Action on Hysterectomy: Evidence on	Dr. Dipti govil Dr. Archana Kujur	Approve

	Women's Health through the Life Course in India		
2	Transforming Healthcare Service Delivery at Pimpri Chichwad Municipal Corporation	Prof. D.A.Nagdeve	Approve
3	Proposal Development for Reproductive Health in India Study	Dr. Chander Shekhar, Dr. Harihar Sahoo, Dr. Archana Kujur	Approve

Agenda Item No.9: To report the matters regarding current academic activities.

The following reported to the academic council.

- 1.The institute has already registered in the Academic Bank of Credit(ABC) and simultaneously published degree on digilocker.
- 2.The academic section has collected feedback namely feedback on Student Satisfactory Survey and feedback on curriculum for NAAC purpose.
3. Master degree students are eligible for fellowship during the Diwali vacation but not in the summer vacation.
- 4.The BoS has approve the fellowship for the student, those who will resume the programme after temporary withdraw from the programme as per the provision of examination manual. others terms and conditions will be the same as admission letter.
- 5.One Ph.D. student has joined the University of Rostock, Germany under Dual Ph.D degree Programme.

Agenda Item No. 10 Any matter with the permission of Chair.

With the permission of the Chair, the following was discussed,

As per the recommendation of Prof. S.K Mohanty, Chairperson, Admission Committee,The member of the academic council agreed to drop the clause of fellowship for the candidates who have not cleared UGC-NET and also recommended to add 'any other fellowship' along with UGC-JRF (wherever applicable) in the upcoming admission bulletin.

The meeting came to an end with the vote of thanks to the chair.

(Prof. D.A.Nagdeve)
Member-Secretary
Academic Council

Prof.S.K.Singh
Director (Additional charge)
Chairperson, Academic Council

ANNEXURE - I

1	Prof. S.K.Singh , Director (Additional Charge)	Chairperson	Attended
2	Mrs. Reena Singh, Chief Director (stats), MOHFW, GOI	Member	Absent
3	Dr. Sunil Vilasrao Gitte, Director, NIPHTR, Mumbai	Member	Absent
4	Dr. Dheeraj Shah, Director, NIHPW, Mumbai (Nominated to Dr. Vijay Kumar Tiwari)	Member	Online Attended
5	Prof. D.A. Nagdeve, HoD, Dept. of Fertility & Social Demography	Member Secretary	Attended
6	Prof. Hemkothang Lhungdim, HoD, Dept. of Public Health and Mortality Studies	Member	Attended
7	Prof. Kailash Chandra Das, HoD, Dept. of Migration & Urban Studies	Member	Attended
8	Prof. T.V. Sekher, HoD, Dept. of Family & Generations,	Member	Attended
9	Prof. Chander Shekhar, Dept. of Fertility & Social Demography	Member	Attended
10	Prof. Sanjay Kumar Mohanty, HoD, Dept. of Population & Development	Member	Attended
11	Prof. R. Nagarajan, Dept. of Population & Development	Member	Attended
12	Prof. Abhishek Singh, Dept. of Public Health & Mortality Studies	Member	Attended
13	Prof. Murali Dhar, HoD, Dept.of Bio-Statistics and Epidemiology	Member	Attended
14	Prof. Archana Roy, Dept. of Migration & Urban Studies	Member	Absent
15	Prof. Dhananjay Bansod, Dept. of Public Health & Mortality Studies	Member	Absent
16	Prof. Aparajita Chattopahdya, Dept. of Population & Development	Member	Attended
17	Prof. Laxmikant Dwivedi, Dept. of Survey Research & Data Analytics	Member	Absent
18	Prof. Nandita Saikia, Dept. of Public Health & Mortality Studies	Member	Attended

**Report Submitted by the Committee to Frame Admission Criteria for M.Sc. in Survey
Research and Data Analytics**

Date: 22/12/2023

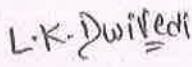

The committee met on 26/10/2023 and 1/11/2023 to propose the admission criteria for the new program of M.Sc. in Survey Research and Data Analytics from the academic year 2024-25. The admission criteria suggested by the committee members was presented in the Board of Studies (BOS) held on December, 1 2023. After incorporating the BOS suggestions, the Academic Council of IIPS approved (on 13.12.2023) the admission criteria as given below-

Eligibility for admission and selection procedure

Candidates with a Bachelor's degree from recognized universities in India or abroad in Statistics, Bio-statistics, Mathematics, Health Statistics, Applied Statistics, Applied Mathematics, Population Studies, Demography, Operation Research, Statistics and Computing, Data Science, Big Data and Analytics or BE/BTech/BCA in Computer Science/Data Science/Big Data and Analytics or BSc in IT with minimum of 55% marks or equivalent grade will be eligible for admission to the above programme. Reservation policies, minimum age and marks relaxation will be applied as per GoI norms.

Selection Criteria for the M.Sc. in Survey Research and Data Analytics

The selection will be made on the basis of online admission test. Admission procedure and fees structure will be same as for other master program of IIPS. Candidates awaiting results of qualifying examination latest by [DATE TO BE FIXED LATER] of the admission year can also apply for consideration.

Prof. L. K. Dwivedi

Prof. U.S. Mishra

Dr. Preeti Dhillon

Dr. Guru Vasishtha

M.Sc. on Survey Research and Data Analytics

Course Curriculum

Committee members:

Prof SK Singh (Chair Person)

Prof Laxmikant Dwivedi

Prof US Mishra

Prof. Bino Paul, TISS, Mumbai

Prof Ramakrishnan, IIT Mumbai

Dr Preeti Dhillon

Dr Guru Vasishtha (invited)

on leave
Le. 1.09.15/16

Program Outcomes:

PO1: To create Survey Research Experts, Data Analysts, for the future, equipped with necessary skills and expertise to address evolving population and health concerns.

PO2: To widen the relevance of the discipline of Survey Research and Data Analytics in the discipline of Population Health and Social Sciences.

PO3: Training students to encourage evidence-based policy making with an understanding of dynamics of data, healthcare informatics and program evaluation methods.

PO4: To inculcate an interdisciplinary approach in their professional pursuit/academic engagement.

PO5: Prepare students for an advanced career in research/academics with sufficient adaptive potential to contribute in the national and international sphere.

Objective: To introduce basic concepts, measures and pattern related to Demography

Course Outcome On successful completion of this course, students will be able to

1. Understand basic concepts and components of demography
2. Basic knowledge of concepts, measures and determinants of fertility
3. Working knowledge of mortality measures and life table construction
4. Understand concept, measures and determinants of migration

Course content

I. **Introduction to Demography:** Definition and Scope: Evolution of demography as a scientific discipline; Nature and scope of demography and changes in it over time. Multi-disciplinary nature of Demography, its linkage with other social science disciplines. Basic demographic concepts. Components of population change. Demographic transition (description rather than theory).

Measures of age and sex structure Defining age and sex, sex ratio, sex ratio at birth, Classification of age group and their importance, Measures of age structure: Percent distribution, Median age, age-sex pyramid, dependency ratio and potential support ratio.

Factors affecting age and sex structure, Importance of age-sex structure in Demography. Socio-economic implications of age and sex structure

II. **Fertility:** Importance of the fertility study in population dynamics; Basic terms and concepts used in the study of fertility

Basic concepts; Problems in fertility analysis; period and cohort approaches; Period measures of fertility - basic fertility measures, order-specific fertility rates, Coale's fertility indices; Cohort measures; Birth interval analysis; Reproduction measures

Determinants of natural fertility; Davis intermediate variables framework of fertility; Socio-economic determinants of proximate variables; Lee and Bulatao framework of fertility determinants; Bongaarts proximate determinants

III. **Mortality:** Need and Importance of the study of Mortality; Some basic measures: - crude death rate (CDR) and Age-Specific Death Rates (ASDRs) - their relative merits and demerits

Need and importance of standardization: direct and indirect technique of standardization of rates and ratios in the light of mortality rates; Decomposition

Infant mortality rate and its sub-divisions; Maternal Mortality Rate, Ratios, Life time risk; Issues related to estimation of maternal mortality measures

Basic concept of a life table; Types and forms of life table; Anatomy of life table; uses of life table in demographic analysis; Construction of life tables; model life tables

IV. **Migration:** Concept of mobility and migration, sources and quality of data, types of migration, census definition of migrants, limitations

Internal migration patterns and characteristics in developing countries with a special focus on India; Determinants of internal migration: Causes of migration at the place of origin and at the place of destination; Patterns of international migration: Historical and recent trends; causes and consequences of international migration

Direct estimation of lifetime and inter-censal migration rates from census data; Indirect measures of net internal migration: Vital Statistics Method, National Growth Rate Method and Census and

Life Table Survival Ratio methods; Methods of estimating international migration; Migration surveys

Essential Reading List

1. Bhende, A., (1996): Principles of Population Studies (Seventh Edition), Himalaya Publishing House, Bombay.
2. Davis, Kingsley (1968). The Population of India and Pakistan, Russell and Russell, New York.
3. Jacob S. Siegel and David a. Swanson (2004): The Methods and Materials of Demography, Second Edition, Chapters 1, 2, 3, 7, 9,10, Elsevier Science, USA.
4. Shryock, Henry S. Jacob S. Siegel and Associate, (1980): The Methods and Materials of Demography Vol.1 & 2, U.S. Bureau of the Census, Washington D.C.
5. John R. Weeks, (2005), Population: An Introduction to Concepts and Issues,Nineth Edition, Wadsworth Publishing Company, Belmont, California.
6. Pathak, K.B. and F.Ram, (1998) Techniques of Demographic Analysis, Mumbai: Himalaya Publishing House, Chapter 4, Pp.108-153.
7. Asha A. Bhende and Tara Kanitkar, (2003), Principles of Population Studies,
8. Sixteenth Revised Edition, Himalaya Publishing House, Mumbai.
9. Hinde, Andrew (1998) Demographic Methods. London: Arnold.
10. United Nations, (1974): Methods of Measuring Internal Migration, Manual VI, UN, New York.

Suggested Reading List

1. Rowland, Donald T. (2006), Demographic Methods and Concepts. New York: Oxford University Press.
2. Yaukey, David. 1985. Demography: The study of Human population. St. Martins, New York.
3. Coale, Ansley J. and Paul, Demney (1983): Regional Model Life Tables and Stable Populations, Academic Press, New York.
4. United Nations (1982): Model Life Tables for Developing Countries, United Nations, NewYork.
5. United Nations, (1979): “Trends and Characteristics of International Migration Since 1950” Demographic Studies No. 64, UN, New York.

Objective: To build foundation on social sciences including Sociology, Psychology, Geography, and Economics

Course Outcomes On successful completion of this course, students will be able to

1. Understand concepts of sociology, society, culture and social change.
2. Acquire basic understanding of Social Psychological Concepts including Psychoanalysis, Personality Motivation, Attitude, Behaviour, Learning and Communication Processes

Course Contents:

I. SOCIOLOGY

Sociology: sociology as a social science- its nature, subject matter and scope Relation of sociology with other social sciences, sociological perspective. Basic Concepts in sociology

The Family: Sociological Significance of the Family; Types and functions of Family; Nuclear and joint families

Marriage: Different forms of marriage, changing patterns of marriage/mate selection in India

Kinship –features of kinship system in India, regional variations

Social stratification : Social Class and Caste: Principles of Class and Caste

Socialization : agencies of socialization

Culture: meaning and characteristics of culture.

Society and Culture in India

Aspects of society and culture in India, and its role and importance in Population Studies.

Social Institutions and their role in influencing demographic situation of the Population of India - Family, Marriage, Kinship and Religion

Caste System

Concept and definition of Caste System, Changing Caste System in India

Social Mobility : vertical and horizontal, intra- and inter-generational mobility

Social Change

Definition and Concept of Social Change. Process of Social and Cultural Changes in India and their role in influencing demographic behaviour: a) Sanskritization b) Westernization c) Modernization

II. Social Psychological Concepts:

Psychology as a Discipline: Branches and dominant Psychological thoughts

Psychoanalysis: Cognitive Behaviour,

Social Psychological Concepts and its relevance to Population Studies

Personality Motivation, Attitude, Behaviour,

Learning and Communication Processes: Concept, Meaning, Scope, and need in the Context of Population Studies.

III. GEOGRAPHY

Importance of Geographical factors- Physical factors (relief, rainfall, temperature, soil and vegetation) Economic and Social factors (Mineral resources and industrialisation, transport, language, religion and caste/tribe); the influence of geographical factors on population.

Geographical approaches: the concept of region- formal and functional regions; the concept of growth pole and regional development; core and periphery; distance and decay function; Maps-scale, choropleth, isopleths and distribution maps.

Physical divisions of India; administrative organization of India. Historic-Cultural regions; Agro-climatic regions; NSS regions.

Theoretical Perspectives in Geography- Place of geography in Social sciences; man and nature relationship- determinism and possibilism; Positivism (quantification) and Phenomenology; and Radical and Postmodern Geography.

Concept of Social Space; Social Structure and Spatial Structure; Role of time and space in social sciences.

IV. ECONOMICS

Introduction:

Defining Economics, Micro and Macro economics, Economic and non economic good, Basic Economic Activities, Factors of Production, Economic Systems.

Basic Concepts in Micro Economics

Concept of Marginal and Total Utility, Law of Diminishing Marginal Utility, Theory of Demand: Indifference curves Theory and Properties, Equilibrium of consumer, Income, Substitution and Price effect. Elasticity of Demand: Price, Income and cross elasticity, Basic concepts in theory of production, cost and market structure.

Basic Concepts in Macro Economics

Basic Concepts in National Income: Concept of GDP, NDP, GNP, NNP, NI, PCI, GDPPCI, PPP, GDPPCI (PPPUS\$), Theory of consumption and saving: Consumption function, Keynes' Psychological law of consumption, concept of APC and MPC, APS and MPS, Factors affecting consumption and savings, Basic concept of Investment.

Economic Theories

Political economy and protectionism – Mercantilism, Classical economics and free enterprise – Adam Smith and David Ricardo, Welfare economics – Alfred Marshall and Amartya Sen, Karl Marx and the Labour theory of Value, Empirical economics – Paul Samuelson.

Indian Economy: Structure, Planning and Growth

Characteristics of Indian Economy: Economic Transition in India, Strategy of economic planning in India, Industrial Policy 1956, 1977 and 1991, New Economic Reforms- 1991, Other Development issues: Poverty and Unemployment.

Essential Reading List

1. Davis, Kingslay, Human Society, MacMillan and Co., New York, (1975), Chapters 1, 3,5,6.
2. Kapadia, K. M., Marriage and Family in India, Oxford University Press, Calcutta, (1966).

3. Mandelbaum, D.G., *Society in India-Continuity and Change*(vol.1) and *Change and Continuity*, (Vol. 2). University of California Press, London, (1970).
4. Mac Iver R.M. and Charles H. Page, *Society: An Introductory Analysis*, Holt, Rinehard and Winston, New York, (1949), Chapters No.1, 3,7,11,15,22,24,25,26.
5. Srinivas M.N., *Social Change in Modern India*, University of California Press, Berkeley, (1966)
6. Haralambos, Michael, *Sociology: Themes and Perspectives*, Oxford University Press, Delhi (1980).
7. Ahuja H.L, *Advanced Economic Theory: Microeconomic Analysis*, S. Chand and Company Limited, New Delhi, Chapters 5,6,7,8,9,12,16, 17, 18, 20
8. Koutsoiannis A, 1979, *Modern Microeconomics*, London: Macmillan Press Ltd,
9. Lipsey and Chrystal, 2004, *Economics*, Oxford university Press, Part One, part two and part five
10. Dasgupta AK, *Epochs of Economic Theory*, OUP, Bombay, Chapters 2, 3, 4, 7 and 8
11. Datt R and Sundaram K.P.M, 2000, *Indian economy*, S. Chand & Company Ltd, Part II.

MSD-C1 MATHEMATICS AND COMPUTING- A REFRESHER

Objective: To comprehend students with knowledge of basic mathematics and computational techniques which are essential to build foundation for survey research methods and data analytics.

Course Outcome: On successful completion of this course, the students will be able to

1. Understand basic concepts of metrics linear algebra which will be useful in data analytics
2. Acquire knowledge of numerical methods which is essential basic knowledge for understanding dynamics of data
3. Understand basic concepts of functions, equations and their solutions
4. Introduced basic computational concepts and software R.

Course Content

I: Set Theory and Vector: Sets, Types of Sets, Basic Operations on Sets, Venn diagram, Cartesian product of two sets, Distributive law, De Morgan's Law, Definition of functions, Domain and Range, Increasing and decreasing functions, Concavity of functions, Types of vectors, Vectors in 2d and 3d planes, vectors in R_n , Vector addition, scalar multiplication and their properties, Dot product, cross product and their applications, Orthogonality

II: Matrices Matrix, Submatrix, types of matrices, symmetric, square, diagonal matrices, singular and non-singular matrices. Addition, Subtraction, multiplication of matrices, Rank of matrix. Trace, Determinants Transpose, Inverse, eigenvalues, eigenvectors

III Vector space: Definition of vectors spaces over real numbers, Subspaces of a vector space, Linear span of vectors, linear dependence and linear independence, Basis and dimension of vector spaces, linear transformation, The matrix of Linear Transformation, Rank Nullity theorem, change of basis and similar matrices

IV: Numerical Methods: Factorial, finite differences, and interpolation. Operators, E and divided difference. Newton's forward, backward and divided differences interpolation formulae. Lagrange's interpolation formulae. Central differences, Gauss and Stirling interpolation formulae. Constant change and linear growth, Equation of lines, Linear functions and graphs, Quadratic, Exponential, and Logarithmic Functions, derivatives. Solutions to differential equations

V Basic concepts for computations: Events, variable, measurement scale of variable, Person-time, Proportion, Ratio, Rate, and Probability, Period, cohort measures, incidence, prevalence

VI. Introduction to Computer Programming: Introduction to computer programs, algorithm, editor, Compiler and Interpreter, Programming Environment: Basic Syntax, Variables and Data Type, Keywords, Basic Operators, Loops, Number, Characters, Arrays, Strings and Functions.

Introduction to R: Installation, importing data, calculations, numbers, vectors, objects, arrays and matrices, dataframe

Readings:

- 1) Kolman, Busby and Ross, PHI, Discrete Mathematical Structure.
- 2) Malik S.C. and Savita Arora: Mathematical Analysis, Second Edition, Wiley Eastern Limited, New Age International Limited, New Delhi, 1994.
- 3) Gentle J.E. Matrix Algebra : Theory, Computations and Applications in Statistics. Springer Science+Business Media, LLC, New York, 2007.
- 4) Goel B. S. and Mittal S. K.: Numerical Analysis, Pragati Prakashan, ND,2008
- 5) Jain, M. K., Iyengar, S. R. K. and Jain, R. K. (2003): Numerical methods for scientific and engineering computation, New age International Publisher, India.

MSD-C2 STATISTICAL-APPROACHES AND AVENUES

Objective: This course aims to provide students with basic knowledge of statistical techniques which is essential to build foundation for survey research methods and data analytics.

Course Outcome:

1. Learn basic measures of central tendency and dispersion
2. Working knowledge of probability distribution
3. Knowledge of concept of correlation and regression and interpretations of coefficients
4. Know basic concept of inferential statistics, including choosing appropriate statistic to test hypothesis

Course Contents:

I. Introduction to statistics:

Descriptive and Inductive statistics. Concept of variables, Nominal, Ordinal and Interval and ratio scale variables. Presentation of data, conversion of raw data into frequency distribution, graphical presentation of nominal, ordinal data,

Measures of Central Tendency:

Mean (arithmetic, geometric, harmonic) Median, Mode; Merits and demerits of different measures.

Measures of dispersion:

Range, Variance, Standard Deviation; Merits and demerits of different measures of dispersion. Measures of Skewness and Kurtosis.

II. Introduction to probability:

Definition of probability, Events: exhaustive, mutually exclusive events; Laws of probability, additive and multiplicative laws of probability, Bayes' theorem with application

Discrete probability distribution:

Binomial and exponential functions, Binomial probability distribution and Poisson distribution and their properties.

Continuous probability distribution:

Introduction to Normal distribution and its properties, applications of normal distribution.

III. Correlation & Regression:

Definition of correlation, scatter diagram, Pearson correlation coefficient, and its properties; Spearman ranks correlation coefficient. Concept of linear regression, fitting of regression line.

IV Statistical Inference Introduction to Statistical Inference, Types of data and variables, Basic principles of statistical inference, The role of probability in statistical inference

A: Estimation

1. Concept of population, random sample, parameter, statistic, estimator, sampling distribution of random sample, joint and marginal distribution of functions of random variables.
2. Role of normal distribution in statistical inference, law of large numbers, Central Limit Theorem, sampling from normal distribution- Chi-square distribution, F- distribution, Student's t distribution and their properties.
3. Methods for finding estimators-method of moments, maximum likelihood, method of minimum Chi-square, properties of estimators: mean square error (MSE), minimum MSE, unbiasedness and minimum variance unbiased estimator (MVUE), Cramer-Rao lower bound of variance, relative efficiency of estimator.
4. Concept of confidence interval, confidence interval for- mean, difference in means, variance, methods of finding confidence interval- pivotal quantity and statistical methods.

B: Testing of Hypothesis

1. Statistical hypotheses- simple and composite, statistical tests, critical region, Type I and Type II errors, size and power of test.
2. Definition of most powerful (MP), and uniformly most powerful (UMP) tests, power functions of tests with illustration, Neyman- Pearson lemma and its application in hypotheses testing regarding binomial, Poisson, normal and exponential distributions.
3. One sample and two sample test for mean, test for a binomial proportion; Score test versus Wald; Exact binomial test; Tests for differences in binomial proportions; Intervals for differences in binomial proportions.
4. Introduce Fisher's exact test; Chi-squared test for equivalence of two binomial proportions; Chi-squared tests for independence; Chi-squared tests for goodness of fit; Hypothesis tests of marginal homogeneity; Estimating marginal risk difference; Estimating marginal odds ratios; Distinction between conditional and marginal odds ratios.
5. Need for non-parametric test, sign test for location of univariate and bivariate populations, Wilcoxon-Mann-Whitney test, run test, median test, and test based on Spearman's rank correlation.

2: Estimation

- Point estimation and interval estimation
- Properties of estimators

- Confidence intervals and their interpretation

3: Hypothesis Testing

- Basic concepts of hypothesis testing
- Types of errors and power
- One-sample and two-sample hypothesis tests

4: Likelihood-Based Inference

- Maximum likelihood estimation
- Likelihood ratio tests
- Goodness-of-fit tests

5: Nonparametric Inference

- Basic concepts of nonparametric inference
- Nonparametric density estimation
- Nonparametric hypothesis testing

6: Advanced Topics in Inference

- Bootstrap methods for inference
- Permutation tests
- Model selection and regularization

7: Applications and Software

- Applications of statistical inference to real-world problems
- Statistical software for inference ()
- Interpretation and communication of statistical results

Objectives: To introduce different data sources and provide an overview of Demographic and Population health surveys across the globe and India.

Course Outcome

1. Working knowledge of the Census, registration system, and history of demographic data sources
2. To comprehend the need, objectives and importance of large-scale data in monitoring and evaluation of health and population policies and programmes
3. Introduced global and national importance surveys
4. Understand the stages of completing a useful and appropriate survey.

I. History of Demographic and Health data Sources

Paris registers, Population registers, Census, Vital registration data, Bills of mortality, Fiscal documents, Military records, Inventories of properties, Genealogies, Marriage practices, Archaeological remains, Administrative geography, Colonization of new land, Cemetery data, Traveler's tales.

II. Population Census and Registration System

Population Census: Population census across the world. Census taking under British India, Indian census, details of different items on which Indian census collect data, enumeration method, publications of census data/ reports.

Registration system: Vital registration system, Civil registration system, Sample registration system (SRS), survey on causes of death, HMIS.

III. Scope of large-scale survey and its phases

Need for large scale surveys, objectives of cross-sectional, longitudinal, rotational and interpenetrating surveys, representativeness. Planning, sampling design, developing data collection tools, field implementation, data process, analysis, report writing and dissemination

IV. Introduction to Demographic, Population Health surveys

Global surveys: World Fertility Survey (WFS); Demographic Health Survey (DHS); Multiple Indicator Cluster Survey (MICS); World Health Survey (WHS); Health and retirement Survey (HRS); Study on Global Ageing and Adult Health Survey (SAGE)

Nationwide large-scale surveys: National Sample Survey Organization's surveys, details of different rounds collecting population and health data; National Family Health Survey (NFHS); District Level Household and Facility Survey (DLHS); Annual Health Survey (AHS); Longitudinal Ageing study in India Survey; Study on Global Aging and Adult Health Survey (WHO-SGAE)-India; Global Youth Tobacco Survey (GYTS); Global Adult Tobacco Survey; YOUTH survey; Nutritional Specific Surveys

Reading List:

1. United Nations (2005): Household Sample Surveys in Developing and Transition Countries.
2. www.unstats.un.org/unsd/hhsurveys/
3. Family Health International: Behavioral Surveillance Surveys. Family Health International, 2000.

7. Livi-Bacci, M. (1996): A Concise History of World Population (2nd edition), Oxford.
8. Maheshwari, S.R. (1996). The Census Administration under the Raj and After, Concept Publishing Company Pvt. Ltd., New Delhi.
9. Registrar General of India, Census of India -2011, Ministry of Home Affairs, Govt. of India. United Nations (1958). Multilingual Demographic Dictionary, John Wiley & Sons Ltd., New York.
10. United Nations, (1973): The Determinants and Consequences of Population Trends, Vol. I, Population Studies, No. 50, Chapter VII, New York.
11. World Population Prospects

MSD-C4	SAMPLING METHODS-BASICS
---------------	--------------------------------

Course Outcomes:

CO1: Gain understanding of basic concepts related to sample surveys with specific references to health and demographic surveys.

CO2: Gain understanding of basic sample survey designs.

CO3: Learn skills to design and implement sample surveys in keeping with research objectives.

1. Concept of sampling: Concept of population and sample, need for sampling, sample survey verses census, elementary units, sampling units, assumptions of sampling from finite population, sampling frame, selection and inclusion probabilities, probability and non-probability sampling, concept of sampling mechanism and sampling design. Overview of complex surveys, Types of sampling methods, Probability sampling designs, Nonprobability sampling designs

2. Sample size computation

Sample size calculations using estimation targets based on relative standard error, margin of error, and power requirements; Use of mathematical programming to determine sample sizes needed to achieve estimation goals for a series of subgroups and analysis variables, Methods of sample allocation for multistage samples;

3. Simple Random Sampling with and without replacement
 - Estimation of population means and totals
 - Sampling error and variance estimation

4: Stratified Sampling

- Estimation of stratum means and totals
- Optimal allocation of sample size
- Weighting methods for unequal selection probabilities

5. **Systematic random sampling:** Concept of systematic sampling, comparison with simple random sampling, variance estimation, comparison with stratified random sampling, systematic sampling, selection procedure for fractional interval, circular systematic sampling.

6. Use of auxiliary information, ratio and regression methods of estimation under simple random sampling, bias, mean square error, and ratio and regression estimators in stratified random sampling.

7. Cluster Sampling

- Definition and properties of cluster sampling
- Estimation of population means and totals
- Design effects and variance estimation

Readings:

11. Sukhatme, P.V. and Sukhatme, B.V. (1970). Sampling Theory of Surveys with Applications. Asia Publishing

MSD-C5	WAYS AND MEANS OF DATA COLLECTION
--------	-----------------------------------

Objective: To comprehend students with working knowledge of data collection methods, questionnaires and software

Course outcome

1. Understand different interview techniques and methods of data collections
2. Able to design checklist and guidelines for qualitative data collection
3. Understand questionnaire structure and standards for large scale quantitative surveys
4. Working knowledge of software used for data collection

Course content

Data collection and Interview Techniques: Mail method, interviews through telephone, internet and computers, face-to-face interviews or personal, self-administered and interview administered questionnaire, Quantitative vs. qualitative data collection, Principles and guideline for interview, language.

Qualitative Methods of data collection: In-depth interviews, key informant interview, observation (participatory and non-participatory), focus group discussion, content analysis, social

mapping, social networking, free listing, pile sorting, projective techniques, mechanical devices (camera, tape recorder), mystery client technique, vignettes method.

Software for Qualitative Research: ANTHROPAC, Atlas Ti and Group Work

Questionnaire Development for quantitative surveys: Types of Questionnaire/schedule, Checklist schedules, structure of questionnaire, roster, skipping non applicable questions, checks. Standardization of tools, Principles of constructing a questionnaire/ interview schedule, Types of questions (knowledge, attitudinal, behavioral, practice), framing of questions (simple, delicate, personal matter), sequencing of questions. Updating/developing new questions. Testing survey tools: Pretest. Translation in regional language

Attitude Scales: Point scales, ranking scales, rating scales, limitations of attitude scales, Types of Scales: Bogardus, Guttman, Likert, Semantic, Thurstone scale.

Software for Data Collection in large scale surveys: Computer assisted personal interview (CAPI), process of data transfers, introduction to features of Census and Survey Processing System (CSPRO), steps for development of data entry software in CSPRO; Web-designed questionnaires.

Ethical consideration in Data Collection: Informed Consent, approvals from institution review board

Field visits and Group work

Reading List:

1. CSPRO Software. www.census.gov/data/software/cspiro.Download.htm
2. United Nations (2005): Household Sample Surveys in Developing and Transition Countries.
3. www.unstats.un.org/unsd/hhsurveys/
4. DHS Manuals
5. NFHS Manual for interviewer
6. LASI manual for interviewer
7. Manual for CAPI used in NFHS

MSD-E1.1 PROGRAMMING WITH R

Course Outcomes:

CO1: Learn open source softwares R for data analysis.

CO2: Learn exploratory data analysis with R.

CO3: Learn use of R programming for model development.

Unit I: Introduction

Introduction to R/RStudio; advantages of R over other programming languages; R packages for data science

Unit II: Importing dataset

Understanding the data; importing and exporting data; getting started analyzing data; accessing database

Unit III: Data Visualization

Histogram; boxplots; bar charts; line graphs; heat map; scatterplots; pie charts; customize plot axes, labels, add legends, and add colors

Unit IV: Data manipulation

Pre-processing data; handling missing values; data formatting; data normalizing; grouping data values into bins; converting categorical variables into numerical quantitative variables

Unit V: Exploratory data analysis

Computation of measures of central tendency and dispersion; computation of correlation coefficient; chi-square test for association between two categorical variables

Unit VI: Model development

Linear regression, multiple linear regression, binary logistic regression; ordinal logistic regression

Essential Reading List

1. Gareth James, Daniela Witten, Trevor Hastie, and Robert Tibshirani, Introduction to Statistical Learning with Applications in R, Springer 2013. Available free online.
2. Christian Kleiber and Achim Zeileis, Applied Econometrics with R, Springer-Verlag, New York, 2008.
3. Download and install R from <https://cran.r-project.org/>
4. Download RStudio from www.rstudio.com
5. Video Tutorials on Installing R on windows
6. Video Tutorials for Installing R on Mac

MSD-E1.2 ANALYSIS in STATA

Course Outcomes:

CO1: Familiarity with STATA for data analysis.

CO2: Learn model development in STATA.

CO3: Learn use of STATA for survey data analysis.

Unit I: Introduction to STATA

Facilities, creating database structure, data entry, specifying scales, validation of data entry, importing and exporting data.

Unit II: Importing dataset

Understanding the data; importing and exporting data; getting started analyzing data; accessing database

Unit III: Data visualization

Histogram; boxplots; bar charts; line graphs; heat map; scatterplots; pie charts; customize plot axes, labels, add legends, and add colors

Unit IV: Data manipulation

Recoding; creating new variable; sorting; filtering and selection of specific data; merging files; generating simple frequencies; use of syntax editor; handling missing values

Unit V: Exploratory data analysis

Computation of measures of central tendency and dispersion; computation of correlation coefficient; chi-square test for association between two categorical variables

Unit VI: Model development

Linear regression analysis - interpretation and regression diagnostic test; regression models for binary outcomes, categorical, and ordinal outcomes

Unit VII: Survey data analysis

Introduction; need for using survey data commands; estimation of means, proportions, ratios, totals; regression models for binary outcomes, categorical, and ordinal outcomes

Essential Reading List

1. StataCorp. 2021. STATA user's guide, release 17. College Station, TX: StataCorp LLC.
2. StataCorp. 2021. STATA survey data reference manual, release 17. College Station, TX: StataCorp LLC.

MSD-C6	DATA VISUALIZATION WITH SOFTWARE
--------	----------------------------------

Objective: To introduce Microsoft power BI and R for data visualization and interactive dashboards.

Course outcomes

1. Develop data visualization and infographics thinking
2. Create interactive dashboards using Microsoft Power BI
3. Prepare attractive and meaningful graphs, maps using different software

I. Data-Analytic Thinking and infographics

Knowing your data, Different types of data, Data pre-processing, Storytelling with data, infographics, making dashboards, Understanding the concepts of dynamic/interactive data visualization and report generation.

II. Data Visualization from Different Sources

Understanding structured, unstructured and semi-structured data sources, Data modelling and creating visualization, Data modelling and creating visualization, charts/dashboards from semi-structured data like CSV files, XML, JSON and others, Data modelling and creating, visualization charts/dashboards from live streaming data.

III. Data visualization with Power BI

Introduction to Power BI, data import, cleaning, building data models, creating visualization, types of visualization, Identify the differences between filters and slicers in a Microsoft Power BI, Customize the filter pane for reporting needs, Making interactive dashboards.

IV. Data Visualization With R

Introduction to R programming, R studio projects, Visualization using R, Transformation using R, Exploratory data analysis, Data manipulation with dplyr (introduction to dplyr package), Data visualization with plot, ggplot2, Data presentation with R Markdown.

Reading List:

MSD-C7	Sampling Methods-Advance
--------	--------------------------

Course Outcomes:

CO1: Gain understanding of complex sample survey designs.

CO2: Know and appreciate the sampling design of large-scale surveys conducted in India.

CO3: Learn estimation of sampling errors in large-scale surveys

CO4: Become aware about the concept of sampling weights and estimation and application of sampling weights in large-scale surveys.

Unit I: Advanced concepts

Use of auxiliary information, ratio and regression methods of estimation under simple random sampling, bias, mean square error, and ratio and regression estimators in stratified random sampling.

Unit II: Multi-stage designs

Introduction; two-stage design; selection of sampling units at different stages; estimation of mean and sampling variance; design effect; intra-class correlation; probability proportional to size sampling

Unit III: Examples of sampling design of large-scale surveys

National Family Health Survey; Longitudinal Ageing Study in India; Sample registration System; National Sample Survey Organization

Unit IV: Estimating sampling errors in large-scale surveys

Taylor series linearization method; replication approach - the Jackknife repeated replication method, balanced repeated replication

Unit V: Sampling weight

Description; computation of sampling weight under different designs; self-weighting designs; post-stratification

Unit VI: Nonsampling errors

Introduction; coverage error; non-response error; response error

Unit VII: Use of STATA and R for sampling and estimates: Sampling and estimation by simple random sampling, stratified, cluster, systematic and cluster sampling, PPS sampling using STATA and R. Introduction to STATA for survey data analysis-SVYSET, SVYTAB, SVYMEAN, SVYPROP, SVYTOTAL, SVYLC. Introduction to R: reading ASCII file, data summarization: frequency and graphical representation, survey data summarization using R. Installation of libraries: sampling, survey, samplingbook, pps. Use of svydesign, svytotal, svymean.

Reading List

1. Kish, L. (1995). Survey Sampling. New York: John Wiley and Sons, INC.
2. Roy, Tarun Kumar, Acharya, Rajib, and Roy, Arun Kumar (2016). Statistical Survey Design and Evaluating Impact. Delhi, India: Cambridge University Press.
3. United Nations (2005). Household Sample Surveys in Developing and Transition Countries. New York: United Nations.
4. Ladusingh, Laishram (2018). Survey Sampling Methods. Prentice Hall India.
5. Cochran, W.G. (1977). Sampling Technique, Third edition. New York: JohnWiley & Sons.

Objectives: In this course students learn the assessment of quality of demographic and health data with special focus on age data, missing values, and outliers. After completion of this course students are expected to get the following outcomes

Course Outcomes:

1. Demonstrate an understanding of the theoretical basis of survey measurement and measurement error; Identify appropriate survey design strategies for a range of measurement challenges
2. Vision to judge the quality of data, comment on it and adjust the data.
3. Learn data processing, including handling missing data and outliers
4. Familiarize to large-scale survey data handling software (STATA).

Course Content

- I. **Data Quality Assessment:** Reliability and validity of measurement: Face, content, construct, convergent, concurrent, and predictive validity; Inter-coder reliability, stability, non-random and random errors, scaling and composite indices.
 Appraisal of the quality of demographic and health data; Completeness of registration data
 Types of errors, coverage and content errors. Sources of errors.
 Examples of data on survey, and census and registration data affected by errors; sampling and non-sampling errors; methods of detecting errors in population data;
 Evaluation and measurement of errors in age reporting; methods of adjustment for age-sex data; method of graduation.
 Post-enumeration surveys; dual record system.
 Techniques of evaluation of age data using Whipple's index, Myer's index, UN Joint score
- II. **Quality assurance procedures in survey**
 Building Checks in data collection tools for consistency in responses, spot check, Revisit of sub-samples, field check tables, Use of AI/ML in data quality assurance, digitization of survey process, non-response pattern, and quality lot assurance, roles of supervisors, editors, field and nodal agencies. Third party audit.
- III. **Large scale data processing and conversion:** process from data collection, validation, cleaning, editing to recoding., conversion to different file format, Conversion of ASCII/ CSpPro data into STATA or other formats.
- IV. **Handling Missing Data:** Assessment of missing data: missing at random, logical, non-response pattern, bias, replacing missing data, imputations by average, by regression method
- V. **Data Management in Software:** Introduction to STATA -facilities, creating database structure, data entry, specifying scales, validation of data entry, importing and exporting data. Reshape data structure and merging files.
- VI. Data manipulation using STATA – recoding creating new variable, sorting, filtering and selection of specific data, generating simple frequencies, use of syntax editor.
- VII. Commands in SQL, data types in SQL, data manipulation and data processing with SQL

Reading List:

1. Bhat P.N.M., (2002): Completeness of India's Sample Registration System: An assessment using the general growth balance method, Population Studies, 56 (2002), 119-134, Printed in Great Britain.
2. Seigel Jacob S. and David A. Swanson (eds.) (2004): The Methods and Materials of Demography. 2nd Edition, New York: Elsevier Academic Press. Chapters 20 & 21.
3. Stata user's guide: Release 10., 2nd Edition. Stata Press
4. Stata survey data reference manual: Release 8., 2nd Edition. Stata Press.

MSD-C9	PROGRAMMING FOR DATA ANALYTICS IN PYTHON
---------------	---

Objective: To introduce the basic and advanced programming in Python.

Course Outcome: On successful completion of this course, the students will be able to

1. Demonstrate the programming skills in Python
2. Apply the Python programming for data visualization, and analysis

Course Content

- I. **Introduction to Python:** Basic Programming in Python: Python Basics, Flow Control, Functions, List, Dictionaries. Automating Tasks Using Python: Pattern Matching with Regular Expressions, Reading and Writing Files, Organizing Files, Debugging, error handling.
- II. **The NumPy ndarray:** a multidimensional array object, creating ndarrays, data types for ndarrays, arithmetic with numpy arrays, basic indexing and slicing, transposing arrays and swapping axes, universal functions: fast element-wise array functions, array-oriented programming with arrays, file input and output with arrays, pseudorandom number generation. introduction to pandas data structures, series, data frame, Web Scraping.
- III. **Data cleaning and preparation:** handling missing data, data transformation, string manipulation. data wrangling: hierarchical indexing, combining and merging datasets, reshaping and pivoting.
- IV. **Introduction to Jupyter Notebook,** Basic libraries for data visualization: NumPy, Pandas, Matplotlib, Plotly, Seaborn, GGplot, Geoplotlib (for handling geographical data).
- V. **Matplotlib:** Introduction to Matplotlib, Basic plots using matplotlib, Specialized Visualization Tools using Matplotlib, Advanced Visualization Tools using Matplotlib, Waffle Charts, Word Clouds.
- VI. **Seaborn:** Seaborn functionalities and usage, Spatial Visualizations and Analysis in Python.
- VII. Introduction to modeling libraries in python: interfacing between pandas and model code, creating model descriptions with patsy, introduction to statsmodels, scikit-learn.

Readings:

1. David J. Pine (2019): Introduction to Python for Science and Engineering. CRC Press.
2. Jake vanderPlas (2017): Python Data Science Handbook – Essential Tools for Working with Data.O'Really Media.
3. Johansson, R.(2019):Numerical Python-Scientific Computing and Data Science Applications withNumPy, SciPy and Matplotlib. A press.
4. Jake vanderPlas (2017): Python Data Science Handbook – Essential Tools for Working with Data.O'Really Media.
5. Johansson, R.(2019):Numerical Python-Scientific Computing and Data Science Applications withNumPy, SciPy and Matplotlib. A press.

Objective: To introduce prediction-based modelling based on advanced regression analysis.

Course outcomes: On successful completion of this course, the students will be able to

1. Formulate linear models in the field of data science.
2. Fundamental knowledge of predictive models.
3. Choose appropriate model by understanding nature of data and regression diagnostics.
4. Test regression diagnosis and choose appropriate model using R and STATA

Course Content:

- I. Linear regression model
- II. Generalized regression model
 - Binary outcome
 - Categorical more than 2 response
 - ordinal
 - Count data
- III. Model diagnostics
- IV. **Fitting Regression in STATA/R** Linear regression model, Generalized regression model: Binary outcome, Categorical more than 2, response, ordinal, analysis of Count data
- V. **Regression diagnostics in STATA:** Postestimation commands for different regression analysis, residuals,
- VI. **Modelling in R:** model basics with modelr, visualizing models, formulas and model families, model building, many models with purrr and broom, gapminder, creating list-columns, making tidy data with broom, making tidy data with broom.

Readings:

1. Gujarati, DN and Sangeetha (2007). *Basic Econometrics* (Fourth Edition), TataMcGraw Hill, New Delhi
2. Retherford, R.D. and Choe, M. K., (1993): *Statistical Models for Casual Analysis*, A Wiley-Inter-Science Publications, John Wiley and Sons, INC, New York.
3. Wickham, H. and Grolemond, G. (2016): *R for Data Science Import, Tidy, Transform, Visualize, and Model Data*. O'Reilly.
4. Lander, J.P. (2017): *R for Everyone-Advanced Analytics and Graphics*. Pearson Education.
5. Wickham, H. (2014): *Advanced R*. CRC Press.
6. Gandrud, C. (2020): *Reproducible Research with R and R Studio*. 3rd edition, CRC Press
7. STATA manual and help for regression diagnostics

MSD-E2.1 INTRODUCTION TO LONGITUDINAL DATA ANALYSIS

Course Outcomes:

CO1: Learn basic concepts and examples of longitudinal data.

CO2: Learn models frequently used for analyzing longitudinal data.

CO3: Learn longitudinal data analysis using STATA/SAS.

Unit I: Introduction and basic concepts

Exploring longitudinal data, Examples of longitudinal studies, Features and characteristics of longitudinal data statistics, Descriptive methods, Criteria, Causality, Repeated measurements, Clustering, Missing data issues.

Unit II: Examples of Longitudinal Data

Young Lives Study; Health and Retirement Study; British Cohort Study; India Human Development Survey

Unit III: Linear Models

Overview of linear models, Distributional assumptions, Modelling the mean and covariance, Maximum likelihood estimation, Statistical inference, Variance and covariance, Fixed-effects models, Random-effects models, Baseline response, Biasness in mean and variance, Diagnostic and residual analysis

Unit IV: Generalized Linear Models (GLM)

Review of Generalized linear model (GLM), Moments and characteristic functions, Weighted GLM, Conditional GLM models, Estimation of Marginal models, Generalized Estimating Equations, Residual and diagnostics analyses.

Unit V: Longitudinal Data Analysis using software

Essential Reading list:

1. Garrett M Fitzmaurice, Nan M Laird and James H Ware. Applied longitudinal analysis; John Wiley & Sons.
2. Diggle, P., Heagerty, P., Liang, K. Y., & Zeger, S. (2002). Analysis of longitudinal data. Oxford University Press.
3. Davis, C. S. (2002). Statistical methods for the analysis of repeated measurements. Springer Science & Business Media.

Suggested Reading list:

1. Walter W Stroup. Generalized linear mixed models: modern concepts,

- methods and applications; CRC Press.
2. Helen Brown and Robin Prescott. Applied mixed models in medicine; John Wiley & Sons.
 3. Brady T West, Kathleen B Welch and Andrzej T Gatecki. Linear mixed models; CRC Press.
 4. Weiss, R. E. (2005). *Modeling Longitudinal Data: With 72 Figures*. Springer Science & Business Media.
 5. Brown, H., & Prescott, R. (2015). *Applied mixed models in medicine*. John Wiley & Sons.

MSD-E2.2 METHODS OF DECOMPOSITION

To be prepared

MSD-E3.1 HEALTH SYSTEMS AND POLICIES

Course Outcomes:

CO1: To develop capacity among students to analyze health systems from an international and comparative perspectives.

CO2: To provide a historical orientation to the students on Indian-scenario; national health policy, health care delivery system, national health programmes and health sector reforms.

CO3: To understand the need and relevance of health legislations as an instrument of protection and promotion of public health and inculcate the ability to critically review them.

CO4: To introduce the students to health policy and systems research, and recent developments.

Unit 1: Basic Concepts: Concepts of Health; Public health; Community health; Preventive and curative health; Health promotion; Health services; and Primary, secondary and tertiary care.

Unit 2: Health System: Goals, boundaries, functions, and WHO's health system building blocks: service delivery, health workforce, health Information systems, access to essential medicines, financing and leadership/ governance.

Unit 3: Health Services: Basic models and functions of health services, international experiences and goals and elements in universal health care (UHC) approach.

Unit 4: Health care system in India: public sector, private sector, voluntary sector, human resources for health, access to health care, utilisation and expenditure on health services, and UHC initiatives and challenges ahead.

Unit 5: Health policy: Concepts and tools of health policy, health policy stakeholders, health policy triangle framework, rational decision making to approach to health policymaking, introduction to health policy and systems research.

Unit 6: Health policymaking in India: Health planning in post-Independent India, national health policies, national health policy 2017, and current national health programmes.

Unit 7: Regulation in the health sector: Need for regulations, mechanisms for regulation, key legislations and standards in the health sector in India, and challenges in the implementation of regulations.

ESSENTIAL READING LIST

1. Abel-Smith, Brian. An introduction to health: policy, planning and financing. Routledge, 2018.
2. Murray, Christopher JL, and Julio Frenk. "A framework for assessing the performance of health systems." *Bulletin of the World Health Organization* 78 (2000): 717-731.
3. Rao, K. Sujatha. Do we care?: India's health system. Oxford University Press, 2016.
4. Government of India. 2017. National Health Policy-2017. New Delhi: Ministry of Health and Family Welfare, Government of India.

SUGGESTED READING LIST

1. Balarajan, Yarlina, Selvaraj Selvaraj, and S. V. Subramanian. "Health care and equity in India." *The Lancet* 377, no. 9764 (2011): 505-515.

9. National Statistical Office. Key Indicators of Social Consumption: Health (July 2017–June 2018). New Delhi: National Statistical Office, Ministry of Statistics and Programme Implementation, Government of India. 2019
10. Peters, D.H., 2018. Health policy and systems research: the future of the field. *Health Research Policy and Systems*, 16(1), pp.1-4.
11. World Health Organization. *A vision for primary health care in the 21st century: towards universal health coverage and the Sustainable Development Goals*. No. WHO/HIS/SDS/2018.15. World Health Organization, 2018.
12. Walt, Gill, and Lucy Gilson. "Reforming the health sector in developing countries: the central role of policy analysis." *Health policy and planning* 9, no. 4 (1994): 353-370.

Course Outcomes:

CO1: Developing a comprehensive understanding on concepts of space, place and region.

CO2: Understanding the history of urban planning and its illustration in Indian context.

CO3: Acquainting students with theories of regional development and various strategies of regional planning.

CO4: Developing a critical understanding on urban policies and programmes in India

CO5: Providing students a practical knowledge of Geographical Information Systems and its utility in regional and urban planning.

I. Urbanization and Space

Urbanization and space: Definitions and concepts of urban areas & urbanization. Concepts and forms of formal and informal spaces; Differences between space, place and region; urbanization and space interaction: gravity model, distance decay model, forces of concentration and dispersion, urban agglomeration and spatial economy; Access and right to the city

II. Evolution of Spaces of Settlements

Settlement: evolution, characteristics and factors; settlement pattern and hierarchy; Urban morphology; Change in urban land use and population density; Rural-urban relationship: dichotomy or continuum; Role of urban centres in rural development.

III. Urban and Regional Planning

Planning: Definitions, concepts, purpose, types and levels; geography/demography and planning relationship.

Regional development/planning: Region: concept and definition, types (formal, functional and planning); Need for regional planning; Types of regional planning; Spatial structure of regions,

Theories of regional development: Stages of development, economic base theory, Industrial location theory, Growth Pole theory; Core-periphery interactions.

Regional planning in India; Planning regions in India; Regional disparity in development; causes and consequences, North-Eastern regional council, Mumbai Metropolitan Regional Development Plan.

Urban Planning: Concepts; history and origins of urban planning; pioneers of urban planning; types of urban plans: New towns, neighborhood, garden city, green belts; healthy urban planning, WHO concept of healthy city, livable city, sustainable city.

Urban policy since independence, important urban plans (New Delhi, Navi Mumbai, Chandigarh, Gandhinagar, Bhubaneswar); Smart Cities Mission; HRIDAY, AMRUT, PURA, RURBAN

mission

IV. Challenges in Urban planning

Recent urban policies and programmes; Urban redevelopment; Urban poverty, urban housing and real estate, Slums and slum rehabilitation, The case of Slum Rehabilitation Authority (SRA) in Mumbai; Urban pollution, Solid waste management; Management of migrants

V. Remote Sensing, GIS and Urban and Regional Planning

Application of Remote Sensing and GIS in urban and regional planning.

Essential Reading List

1. Friedman, John and William Alonso (1964) *Regional Development and Planning: A Reader*, The MIT Press, Massachusetts.
2. Friedman, John (1966) *Regional Development Policy: A Case Study of Venezuela*, MIT Press, Massachusetts.

20. UNEP and others (2007), *Livable Cities: The benefits of environmental planning*, The CitiesAlliance, Washington. <http://www.citiesalliance.org/idx.html>.

MSD-C11 RESEARCH, ETHICS AND PUBLICATIONS

Course outcomes

1. To understand the research design and scientific approaches to conduct of research in varied settings.
2. Aware of different types of publications, search engines, copyrights.
3. Understand research, publication and data ethics.

I. Philosophy of Research

- Law, Theory, and Model
- Overview on Main Assumptions and Arguments of Selected Social Theories (functionalism, conflict theory, symbolic interactionism, system theory, feminist theories, change theories)
- Causation and Research Design
- Criterion of causation
- Nomothetic casual explanation
- Idiographic casual explanation

II. Need for Research and its phases

Definition of Research, Assumptions, Operations and Motivations and Aims of Scientific Research. The Research Process: conceptual, Empirical and Analytical Phases of Research.

II. Research Designs

Conceptual vs. Empirical; Quantitative vs. Qualitative, Observational Studies: Descriptive, Analytical studies, explanatory, and exploratory, Experimental Studies: Pre-test design, post-test design, Follow-up, longitudinal design, Action research studies, Panel Studies; evaluative studies.

III. Research Process

Defining and formulating the research problem, selecting the problem, necessity of defining the problem, importance of literature review in defining a problem, literature review, identifying gap areas from literature and research database, development of working hypothesis, conceptual framework, sampling, developing tools, data collection, process, analysis, report writing

IV Research Publications

Overview of different type of research articles: -primary and secondary sources, reviews, monograph, patents, research databases, web as a source, searching the web, critical literature review, journals, books, publishers, impact factor, reference style

V. Ethics in Research

Ethics of Research, History of ethical guidelines and general principles Informed consent and human subject protection ICMR ethical guidelines for biomedical research on human participants The Biomedical research on human subjects -regulation, control and safeguards

Ethical issues in data collection and willingness to pay

Ethics in Data Analytics/computing

Data obfuscation, encryption, confidential computing, privacy implementation.

Scientific Misconduct and Publication ethics

falsification, fabrication, and plagiarism, Selective reporting and misrepresentation of data. practices/standards setting initiatives and guidelines, Conflict of interest, Violation of publication ethics, copyright and sharing policies

Essential Reading List

1. Bernard, H. Russell, (1995): Research Methods in Anthropology: Qualitative and Quantitative Approaches, Altamira Press, Walnut Creek.
2. Goode W J and Hatt P K. 1952. Methods in Social Resasrch. McGraw Hills, New York.
3. Kish, Leslie, (1995): Survey Sampling, John Wiley and Sons, Inc. New York.
4. Lohr L. Sharaon., (1999): Sampling: Design and Analysis, Duxbury Press, London.
5. Mukherji, P.N., (1999): Methodologies in Social Science, Sage Publications, New Delhi.
6. Royce A. Singleton and Bruce C. Straits, (1999): Approaches to Social Research, Oxford, Oxford University Press.
7. Young P V. 1994. Scientific Social Surveys and Reasearch. Prentice-Hall, New York (4th Edition).

Objective: To provide conceptual knowledge and applications of AI and ML.

Course outcome:

1. Describe the concepts of AI and machine learning
2. Visualize the applications of AI and ML in public health interventions and data analytics
3. Apply the machine learning tools in data science.
4. Develop technological foundation of cloud computing

Course Content:

- I. **Basic concepts of Big Data:** Concept of Big Data, 5Vs, Data Science, Machine Learning (ML), Deep learning (DS), Artificial Intelligence (AI). Survey data vs. digital data – advantages and disadvantages
- II. **Application of AI** for planning and monitoring of public health and welfare programmes, Healthcare informatics, Telemedicine, digital health, surveillance. Chatbots
- III. **Relational Database Management Systems:** SQLite with R, MariaDB with R on amazon EC2 instance, PostgreSQL with R on amazon RDS.
- IV. **Digital trace data and cloud computing:** Digital trace data from social media, websites, Introduction to Cloud Computing, Migrating into a Cloud, Monitoring, Management and Applications, Data Security in the Cloud, Legal Issues in Cloud computing.
- V. **Machine Learning:** concepts, Types of machine learning – supervised, unsupervised, reinforcement learning. Regression vs. classification problem, algorithm vs models, Basics of machine learning model building, train-test split, model evaluation, ROC curves, application of machine learning in health, public health and demography, Advantages and disadvantages of ML.
- VI. **Models in machine learning** –Basics of Decision Trees, trees vs linear models, Random Forest, fitting of classification and regression trees, support vector machines, Clustering (K-nearest neighbours, PCA), Neural Networks.

Reading List:

- 1) Tom Mitchell, “Machine Learning”, McGraw Hill, 1997
- 2) E. Alpaydin, “Introduction to Machine Learning”, PHI, 2005.
- 3) Andrew Ng, Machine learning yearning URL:
https://nessie.ilab.sztaki.hu/~kornai/2020/AdvancedMachineLearning/Ng_MachineLearningYearning.pdf
- 4) Russell, Norvig, Artificial Intelligence: A Modern Approach, Third edition, Prentice Hall, 2010
- 5) Burger, S.V. (2018): Introduction to Machine Learning with R: Rigorous mathematical modeling. O Reilly.

- 7) Lewis, N.D. (2017): Machine Learning Made Easy with R: An Intuitive Step by Step Blueprint for Beginners. CreateSpace Independent Publishing Platform.
- 8) Vecciola, B. and Selvi (2017): Mastering Cloud Computing: Foundations and Applications Programming. Tata McGraw Hill.
- 9) Rittinghouse and Ransome (2009): Cloud Computing: Implementation, Management and Security. CRC Press,
- 10) Doss, A. (2013): Cloud Computing. Tata McGraw Hil

MSD-C13	PROGRAM MONITORING, AND EVALUATION DESIGN
----------------	--

Course Outcomes: After completing the course, students will be able to-

1. Develop M & E framework and Statistical Analysis Plan
2. Demonstrate an understanding of the essential principles and design of Program evaluation
3. Learn statistical methods used in evaluation Program
4. Understand Ethical issues in evaluation research
5. Understand public interventions related to health and family welfare

I. Introduction to Monitoring and Evaluation: Basic concepts, Difference between Monitoring and Evaluation; Linkage between Planning, Monitoring and Evaluation; Importance of Monitoring and Evaluation, Databased decision making

II. Monitoring and Evaluation Framework: Resources for monitoring and evaluation, Engagement of stakeholders in monitoring and evaluation; Meaning of Indicators, Ideal requirement, process of developing indicator, illustration of indicators developed from large scale surveys, measurement, need & levels of indicator; Challenges in developing indicators from Large-Scale Surveys; Types of Indicators – Input, Process, Output, Outcome, Impact; Learning and accountability of Monitoring and evaluation data

III. Monitoring of Policy Implementation: Components of policy and programme, budget, staff, process of evaluation, developing tangible indicators for policy monitoring in terms of Input, Process, Output, Outcome, Impact; Result based inference

IV. Evaluation in Theory: Principles, norms and standards for evaluation; Criterion for evaluation; Theory of Change; Evaluating for results; Roles and responsibilities in evaluation; Scaling Impact

V. Evaluation Design: Determination of sample size under different approaches and design including measurement of change due to certain interventions; Quasi Experiment design, Case control design, Evaluation Terms of Reference, Formative and Summative Evaluations, Managing Evaluations; Evaluation at different points: Baseline, Mid-point, Concurrent and End line evaluation; Randomization, Statistical design of Randomization; Randomized control trials, time dependant cluster design, interrupted time series analysis.

VI. Assuring the Quality of Evaluation Design and Methodology: Overview; Defining the context; The evaluation purpose; Focusing the evaluation;

Evaluation methodology; Mandatory requirements for programme; SWOT analysis of NHM, ICDS and National Livelihood Mission; Social audit – meaning, objectives, advantage, case study of social audit

VII. Statistical Approaches of Evaluation of Intervention Programme: Statistical inferences used in different intervention design – z, t, F and paired ‘t’ tests, two stage LSM, instrument variable method; Propensity score matching; Difference in Difference Method: Theory and application, advantage and disadvantage, regression implementation, Decomposition analysis

VIII. Healthcare Informatics: MIS – Monitoring information system; Role of programmers; HMIS system; Global Positioning System, Management Information System and Use of Technology, Use of Artificial Intelligence, tele-interventions, Use of spatial data

IX. Group work and presentation on Health and family welfare Program evaluation: review program, SWOT analysis, preparing M&E framework/choosing framework indicators and methods for evaluation

Reading List

Baltimore, Maryland: Center for Communication Programs, Johns Hopkins Bloomberg School of Public Health; Washington, D.C.: Constella Futures; Cambridge, Massachusetts:
10. Management Sciences for Health, 2007.
11. United nations development Group. *The Theory of Change, UNDAF Campanion Guideline*.

1: Multistage Sampling

Definition and properties of multistage sampling, Estimation of population means and totals, Sampling weights and variance estimation, Multi-stage sampling with examples, Methods of variance estimation for complex sample designs, including the Taylor series expansion method, balanced repeated replications, and jack-knife methods, Bootstrap methods for complex sample designs and how to incorporate those methods into inference for complex sample survey data. the effect of stratification and clustering on estimation and inference, alternative variance estimation procedures;

2: Weighting and Imputation Methods

- Development and handling of selection and other compensatory weights; methods for handling missing data; methods for incorporating weights, stratification, clustering, and imputed values in estimation and inference procedures for complex sample survey data;
- Nonresponse and missing data in complex surveys
- Weighting adjustments for nonresponse and noncoverage
- Imputation methods for missing data

- Steps in weighting, including computation of base weights, non-response adjustments, and uses of auxiliary data;
- Non-response adjustment alternatives, including weighting cell adjustments, formation of cells using regression trees, and propensity score adjustments;
- Weighting via post-stratification, raking, general regression estimation, and other types of calibration.
- Examples- NFHS, SRS, NSSO, Sero-surveillance

3: Model-Based Inference

- Model-assisted and model-based estimation
- Regression models for complex survey data
- Incorporating design effects into regression models

4: Design-Based Inference

- Variance estimation for complex survey data
- Survey data analysis using statistical software
- Generalized design effects and variance functions.

5. Weighting and Variance Estimation

- Weighting adjustments for unequal probabilities of selection
- Variance estimation in complex surveys

MSD-E4.1 CONCEPTS AND MEASURES OF GLOBAL HEALTH

Objectives: This paper introduces to the students the basic concepts of global health. This course emphasizes on understanding the global burden of disease and measuring population health. A key component of this course is to understand the determinants of health and health disparities. It will also provide student with a broad understanding of the relationship between environment and health. It also develops the understanding of the students about the health care delivery system, human resources for health, migration of human resources for health, etc. Finally, it introduces to students the issues related to policy and health.

Course Outcomes:

CO1: To familiarize the students with the emerging concepts, measures, and significance of global health in contemporary world.

CO2: To understand the global mortality transition in terms of its varied features like cause of death, population structure and differential quality of life.

CO3: To understand the impact of poverty, inequality on disease prevalence, health infrastructure, deprivation for the mortality divide and its repercussions.

CO4: To introduce and understand impacts of environmental factors and recommend public health measures needed to be taken to mitigate health effect of climate change.

CO5: To recommend appropriate public health intervention in keeping with disease burden and evaluate health system performance in international perspective.

Course Contents

- I. Concept and introduction:** Concept of global health; why is it important to study global health?; health and development in the global context; demographic, health and epidemiological transitions; major patterns of distribution of disease in the world; sources of data on disease and disability
- II. Global burden of disease:** Concept of burden of disease; hypotheses related to burden of diseases – compression of morbidity, expansion of morbidity and dynamic equilibrium; measures of burden of disease at the population level – health expectancy and health gap; methods for estimating DFLE, HALE and DALY; how does the burden of disease and mortality vary by geography, social class, race and gender? GBD 1990, 2010 and 2013 – changes and continuities; new and re-emerging infectious diseases; issues related to HIV/AIDS; introduction to NCDs; double burden of diseases in

developing countries; impact of tobacco abuse; trends and challenges related to maternal and child health; maternal mortality

- III. Determinants of Health:** Culture, gender, race, social, political and economic determinants of health and health disparities; contribution of income, education and other factors to health; Factors responsible for variation in the global burden of disease across countries; poverty and health; income inequality and health; health risk factors
- IV. Environment and health:** Role of water, sanitation, indoor and outdoor air pollution and nutrition in explaining global health disparities; climate change and health; migration, disaster (man-made, natural), conflicts and epidemics
- V. Health care delivery systems:** Introduction to health systems; how to measure performance of health system?; health systems in different countries; factor responsible for better performance of health systems in developed countries; the distribution of human resources for health; quality of human resources for health; the push and pull factors associated with the migration of health care providers
- VI. Policy and health:** Human rights approach to health; national and international policies related to health; how are global health priorities set?; the role of international actors like WHO, World Bank, etc. in global health; influence of international priorities on national priorities

MSD-E4.2	HEALTH ECONOMICS AND FINANCING
-----------------	---------------------------------------

Course Outcomes:

1. To introduce various concepts on economic gradient of health and demand for and supply of health care. CO2: To explain various measures on socio-economic inequality in health.
2. To familiarize the means and measures of health financing.
3. To understand the determinants of health insurance and its coverage.
4. To introduce the methods and measures on economic evaluation of health care.

I: Introduction to Health Economics

Defining health economics, why health economics is important, basic concepts in microeconomics, health across world and over time, scope of health economics, map of health economics, basic questions confronted by health economist, concept of efficiency and equity in health, Production Possibility Frontier (PPF), economic gradient of health, causation of income and health, Preston Curve, economic models and analysis, expenditure function, Theories of X and Y, positive and normative economics.

II. The Demand for Health and Health care

What is Health and Good Health, Utility Analysis, Health as a form of human capital, What is Medical Care, The production of Good Health, Empirical evidences in the production of health, Health as human

capital, Grossman Model, The Demand for Health Care, Demand function for health, Economic and non-economic factors of health care, Fuzzy Demand Curve, Price and income elasticity of demand for health care, Important consideration in estimating health care demand elasticity, provider's behavior, Empirical findings, externalities and market failure.

III. Health Financing

Health financing in low, middle and high income countries, demographic transition, epidemiological transition and health expenditure, disparity in disease burden and per-capita health spending, sources of health care in India, out-of-pocket expenditure on health care, catastrophic health expenditure, approaches in measuring catastrophic expenditure, impoverishment, health care payment and poverty, national and regional patterns of catastrophic health spending, determinants of catastrophic health spending, Drivers of health care expenditure, health financing in India, Equity in health care finances, Willingness to pay for health care, User charges as determinant of health financing, Performance based financing

IV. Health Insurance

Health care system, a model of health care system, defining health insurance, need for health insurance, type of health insurance, demand for private health services, factors affecting the quantity demanded of health insurances, moral hazards, deductibles, co-insurance, managed care, adverse selection, loading fees, employed based insurance, reimbursement, selection effect, intermediary agent, regulation of health insurance, Need for Government intervention, Trends of health insurance, Coverage of health insurance in India, PM-JAY, coverage and effectiveness

V. Measuring Health Inequalities

Measurement of health inequality: A Prelude

Why measure health inequality; Health equity and inequality: Concept and definitions; Understanding of the concepts such as need, access and utilisation; cardinal and ordinal health variables

Black Report and Beyond

Historical Background of Black Report, Explanation for social class differences, major empirical theme since Black report

Measures of health inequality:

Measures of health inequality: Index based approach; Axiomatic approach to measurement; Individual-mean and inter-individual comparison; WHO Index, Coefficient of Variation, Generalised Entropy Index, Lorenz Curve and Gini Coefficient

Measuring socioeconomic rank related health inequality

Slope index of inequality; Relative index of inequality; Concentration curve and concentration index: various ways of computing; Standardization; Inequality aversion; Normalised and Generalised concentration index; Corrected concentration index

Measuring inequality in healthcare utilisation

Horizontal inequality; Vertical inequality; Regression based approach; Measurement of horizontal inequalities; Group inequality, common measures, Gini type index

V. Medical Care, Production and Cost

The Short-Run Production Function of the Medical Firm, Total Product, Marginal Product and Average Product Curve, Law of diminishing marginal productivity, The importance of costing in Health Economics, Short-run cost theory of medical firm, short run cost curves, Cost analysis, Implicit and explicit cost, , factor affecting short-run cost curves, cost minimization, constraints in measuring health cost

VI. Economic Evaluation

What is economic evaluation? Cost analyses; direct cost, Indirect cost, tangible cost, capital cost, fixed cost, variable cost, Opportunity cost, average cost, marginal cost, Incremental cost, steps in cost analyses: Identification, measurement and valuation, Various types of economic evaluation used in health care: Cost effectiveness analysis (CEA) Cost-Benefit Analysis (CBA), Divergence between social and private costs and benefits in health care, Limitations of economic evaluation, Consumer Impact Assessment.

10. Xu K (2005))Distribution of health payments and catastrophic expenditures Methodology World . Health Organization

The objectives of learning the course is to acquaint students to understand demographic models, indirect estimations and carry out population projections independently and apply them in other social sector projections.

I. Concepts of Demographic Models:

Stable population; Generalized Population; Momentum of Population Growth; Concept of Multiregional Model; and Micro Model such as Birth Interval, Waiting Time (Birth Distribution etc, Estimation of fecundability?)

II. Indirect methods for estimating fertility:

Needs for Indirect methods; Concept of Reverse Survival Method, Robust Method and method based on Generalized Population Model; Rele's Method; Concept of P/F ratio method and its modification [Hypothetical Cohort methods]

III. Indirect Method of Estimating Mortality:

1. Indirect Methods of Estimating Infant and Child Mortality

(a) Basic concepts, fundamental assumptions and underlying principles to the technique proposed by Brass based on retrospective data on children ever-born and surviving mothers classified by current age of mother; (b) Modifications proposed by Sullivan and subsequently by Trussell over Brass method; and (c) the UN revised and extended version of Trussell's method.

2. Some Methods of Estimating Adult (including Maternal Mortality) and Old Age Mortality

(i) Some methods of estimating adult mortality using successive census age-distributions; (ii) Methods of estimating life expectancies at older ages; and (iii) Estimation of maternal mortality through sisterhood method.

3. Some Indirect Methods for Estimating Death Registration Completeness for Countries Having Limited and Defective Vital Registration Data

An overview of some selected methods of estimating completeness of death registration, starting from Brass growth balance method and its subsequent development.

VII. Lab Practice in MORTPAK

MSD-E5.1	Population Ageing and Generational Analysis
-----------------	--

Course Outcomes:

CO1: Learn concepts and theoretical framework relating to demography of ageing, and its health and societal interface.

CO2: Develop skills to analyze trends, determinants and consequences of population ageing.

CO3: Familiarize with generational analysis

Unit I: Demography of ageing

A. Concepts and measures of population ageing; components of population ageing; Inter-relationship between population ageing, fertility, mortality and migration; population ageing and momentum of population growth, age structure transition and ageing, and declining population.

B. Population ageing trends, patterns and determinants in India; state variations; future scenario of population ageing in India and states.

Unit II: Life course perspective and social dynamics of ageing

A. Life course perspective of population ageing; Age and Ageing, Ageism; Social Status and Roles of Elderly, Family Structure, Intergenerational relations, Kinship and family support, Social Security; Social network- Frameworks (Berkman and others) and measurement.

B. Living Arrangements of Elderly, Old Age Homes, Social Networks, and Contribution of elderly: “Feminization” of Ageing, Dependency, Gender Dimensions and Discrimination, Widows, Elder abuse, Social and legal Vulnerability.

C. Generational analysis

Unit III: Ageing and health

A. Ageing and Functional Health: Ageing and disabilities; trends and prevalence; Wellbeing and Life satisfaction.

B. Ageing and mental health problems; cognition, memory loss, dementia and depression; Alzheimer’s and Parkinson.

C. Ageing and health risk factors: nutrition, diet and food practices; health risk behaviour-tobacco, alcohol; physical activities

Unit IV: Ageing policies and programmes

A. Social and Economic Support Policies and Programmes for the Elderly- Retirement, Pensions and Social Care Policies in developed and developing countries. Social security and welfare policies and programmes for elderly in India. National Programmes for HealthCare of Elderly (NPHCE); National Policy for Senior Citizens

B. Worldwide Longitudinal Ageing Studies: LASI, SAGE, SHARE, HRS, CHARLS, JSTAR, etc.

Essential Reading List

1. Chakraborti, Rajagopal Dhar (2004), *The Greying of India: Population Ageing in the Context of Asia*, SAGE Publications Private Limited, New Delhi.
2. UNFPA, 2001, *Population Ageing and Development: Social, Health and Gender Issues*, United Nations, Malta.
3. UNFPA (2011), *Report on the status of elderly in select states of India*, UNFPA, India.

Suggested Reading List

2. United Nations (2001): *Living Arrangements of Older Persons: Critical Issues and Policy Responses*. Population Division, Department of Economic and Social Affairs, Special Issue Nos. 42/43, 2001, New York.
3. Sandra Gruescu, (2006), *Population ageing and economic growth*. Physica-Verlag.
4. M. Alam (2004). Ageing, old age income security and reforms: An exploration of Indian situation. *Economic and Political Weekly*, 39(33): 3731-3740.
5. Berman, Lisa (2000) "Social Support, Social Networks, Social Cohesion and Health" *Social Work in Health Care*
http://dx.doi.org/10.1300/J010v31n02_02.
6. Pool, Ian, Laura R. Wong and Eric Vilquin (ed) (2006), *Age-structural transitions: challenges for development*. Paris: CIRCRED.

Course Outcomes:

CO1: Learn the concept of sustainable development and its challenges.

CO2: Learn quantitative and qualitative methods in environmental health analysis.

CO3: Comprehend the role of the environment in development modeling.

Unit I: Sustainable development: Conceptual and contemporary issues

Sustainable development; Meaning, Concepts, and Definitions; Inter-linkages between ecology and development; Brundtland Report on Environment and Development; SDG goals, progress; Pillars of SDG; Environmental Kuznetz model, Living Planet Index, ecological footprint;

Approaches to environment; Gandhian, Socialist, Neo-classical approach; Environment and development challenges: Water, energy, health and disease, nutrition, education, energy, food, species, climate;

Trends of global warming and climate change; drivers of global warming and Global Warming Potential (GWP) & climate change; impact of climate change on atmosphere, weather patterns, sea level rise, agricultural productivity and biological responses, CO₂ fertilization and agriculture; impact on the economy and spread of human diseases; the challenges for International Environmental Governance.

Unit II: Environmental challenges in India

Calamities and the measurements; urban challenges; environmental health hazards; air Pollution and health- estimate, data sources, Indian standards, geospatial modeling;

Water resources and condition of surface and ground water resources; water quality standards in India; role of state in water resources management, water and health;

Regional Development in India; Women and Environment; Green Movements in India; Solid Waste Management; Success models of efficient environmental management;

Unit III: Environmental resilience, adaptive capacity, and vulnerability (RACV)

Meaning and measurements of vulnerability and resilience, concept and processes of adaptive capacity; indicators and modeling; qualitative methods to measure RACV; Case studies and practical exercises.

MSD-E5.3	GENDER, HEALTH AND DEVELOPMENT
----------	--------------------------------

Course Outcomes:

CO1: To sensitize students on gendered perspectives in reading health and development outcome

CO2: To gain an understanding of theoretical and conceptual issues involving gender in examining development at large

CO3: To acquaint students with varied gendered frameworks and relevant analytical tools towards gendered inspection

CO4: To offer skills of adopting a gendered outlook in introspecting health and development.

Introduction

The purpose of this section is to explain the basic concepts of three major components of this course namely gender, health and development.

The Concept of gender, Evolution of gender in historical perspective

Patriarchy, Kinship Structure and gender roles, Feminist theories, Gender stratification in traditional and modern societies, Gender Analysis Tools, Gender Sensitive Indicators and Gender budgeting and auditing

Concept of health, Evolution of the concept of Reproductive Health, life cycle approach to RH and recommendations from ICPD

Changing concept of development, Indicators of development, gender adjusted

HDI

Gender and Health

This section presents the situation analysis regarding sex differentials in different aspects of health and highlights some special issues of women and men's health.

Situation analysis of sex differentials in morbidity and mortality

Major morbidity and mortality burden in the developing world with major focus on India- sex ratio of births, major health problems experienced by women and men, reproductive health of women and men in developing world, differentials in use of male and female methods of contraception

Health infra-structure and health care providers

Nutritional status, susceptibility to infections

Accidents and other risk factor and health seeking behavior

Health and Nutrition issues of adolescent of boys and girls , abuse and maltreatment, Puberty, Sexual Debut, Adolescent Pregnancy, Abortion, women and family planning programs, Contraceptive Technology

Major risk factors of men's health: masculinity, alcoholism, tobacco and drug consumption, accident

Gender and Sexuality: Sexual health of men and women, gender dimension of HIV /AIDS. Gender and Infertility

Gender and Development

The purpose of this section is to understand the sex differentials in health in terms of socio- economic and cultural context of gender and to study the gender dimensions of development.

Understanding social structures- role of caste, class, ethnicity and religion and gender in health inequalities and health outcomes

Gender dimension of social development, status and role of men and women in household and community, culture, marriage customs, dowry and bride price practices, age at marriage

Gender differentials in household headship and role in decision making

Gender differences in access to knowledge-, education, exposure to media and freedom of movements

Gender based violence- Domestic and community violence and gender, Legal aspects of domestic violence and rape

Women's role in community life and involvement in politics-as voter, political worker and leader, women in Panchayati Raj Institutions and self-help groups

Media representation of men and women

Gender dimension of economic development: women's access to economic resources, entitlements, land ownership, inheritance laws, access to credit, measurements of women's work, profiling women's work, informal sector involvement, working condition, maternity benefits, wage differentials, gender and poverty
 Globalization, changing pattern of economic activity, issues of marginalization and vulnerability along with agency, negotiation and spaces of power, Gender Divisions in Urban Labor Markets, Gender and Migration
 Housing, Household environment and its differential impact on men and women's life
 Environmental degradation, changes in climate, water table and land use and their differential impact on men and women

Gender mainstreaming in health and development programs

The purpose of this section is to understand the concept of mainstreaming gender in development and to review the measures taken for eliminating undesirable impact of gender inequalities and to bring women in the main stream of development

The concept of Gender Mainstreaming

Historic overview of Gender Mainstreaming- Women in development (WID) concept and criticism by feminist; shift to Gender and Development (GAD), Gender Mainstreaming and the Millennium Development Goals (MDGs)

The rights approach to Health, sexual and reproductive rights, violence, human rights and health Paradigm shift from the Target Based Supply Driven Fertility influencing programs to RH Approach.

Legal aspects – laws regarding marriage, dowry, domestic violence, rape PNDT act, property inheritance, maternity and other benefits of working women, sexual harassments at workplace, reservations in political institutions and Gender mainstreaming in various health and development sectors- e.g. Agriculture, Health, Education, gender in work place (Public & private) etc. Advocating for Gender equality

Gender responsive policy making and planning of health and development programs.

Section 5: Some case studies of Gender analysis of health and development programs, budgeting and auditing

This section aims to give necessary skills and tools to undertake the gender analysis of health and development policies and programs and to help them to develop gender sensitive indicators and measures

MSD-C16	APPLIED MULTIVARIATE ANALYSIS
----------------	--------------------------------------

I. Review of Multiple Linear Regression Analysis and its Assumptions

II. Advanced Multivariate Techniques

- Simultaneous equation models- the identification problem. Methods of estimation-the instrumental variable method and two-stage-least squares method. Diagnostic checking and model selection
- Generalized linear models: A general model for the response probability, the logit, the probit and the complementary log –log model, choice of link function, Estimation of the generalized model. Latent variable representation of a generalized linear model.
- Revision and extended to binary outcome Structure Equation Modelling, Structural Approach to evaluate the policies/programs, IV-method, structural equation modeling (with an application of latent class models to methodological studies of measurement error),
- Multilevel modelling: A multilevel model for group effects, estimating group effects, random vs. fixed effects, random intercept model
- Generalized linear random intercept model, random intercept logit model, a random slope logit model
- Multilevel and marginal modeling techniques for clustered or longitudinal data (with applications to methodological studies of interviewer effects and modeling trends in the NFHS/LASI survey), two-level random intercept model,
- Concept of Bayes theorem and development of regression techniques based on Bayes concept and its application
- Computer Applications using Stata and MLwiN softwares

Objective: The objectives of learning the course is to acquaint students to carry out projections, and forecast independently and apply them with real data.

Course Outcome: On successful completion of this course, the students will be able to

1. Demonstrate the concepts of time series analysis, projection and forecast
2. Understand demographic, mathematical and statistical methods of projections
3. Forecasts with valid conclusions based on appropriate time series data.

I Time series analysis: significance of time series analysis, Nature of time series data, measures of dependence, assumption, and component (stationary non-stationary), vector-valued and multidimensional series, moving average, smoothing in the time series context, autoregressive model, ARMA, ARIMA, application in forecast

II. Concept of Projections and forecast: basic concepts and need for projections, forecast, time series analysis, different approaches of projections and forecast: mathematical, time series, regression based, simulation, period vs cohort, building scenarios, expert opinion,

III. Population Estimates and Projections

Concepts of population projections; population estimates, forecasts and projections, uses of population projections.

Methods of interpolation; extrapolation using linear, exponential, polynomial, logistics, Gompertz curves and growth rate models.

Cohort component method: basic methodology; projection of mortality, fertility and migration components; population projections of United Nations, World Bank and Expert Committees of Government of India; accuracy of population projections. Methods of rural-urban and sub-national population projections.

IV. Mortality Forecasts: Lee-carter model, ARIMA model, cause specific mortality

V. Methods of socio-economic projections: labour force projections, school-enrolment, health personnel and households. Multi-state projections and forecasting, Age-Period-Cohort methods

Reading List

1. Box, G., Jenkins, G.M. Reinsel, G.C. and Ljung, G. (2016): Time Series Analysis: Forecasting and Control. Fifth Ed., Wiley.
2. Montgomery, D.C., Jennings, C. and Kulahci, M. (2016): Introduction to Time Series Analysis and Forecasting. Second Ed., Wiley.
3. Shumway, R.H. and Stoffer, D.S. (2017): Time Series Analysis and Its Applications: With R Examples. Fourth Edition. Springer.
4. Navaneetham Kannan and George Groenewold, (1998): The Projection of Populations: Data Appraisal, Basic Methods and Applications, Population and Sustainable Development Teaching Texts, Thiruvananthapuram: Centre for Development Studies.
5. Smith Stanley K., Jeff Tayman, and David A. Swanson, (2001): State and Local Population Projections: Methodology and Analysis. New York: Kulwer Academic/Plenum Publishers.

Course Outcomes:

CO1: Understanding the concept of space and develop spatial dynamics in demographic process.

CO2: Learning visualisation tools of demographic data and draw inferences.

CO3: Learning different Geo-Spatial software to facilitate spatial analytical methods in demographic research.

CO4: Learning Geographic Information System (GIS), spatial pattern analysis and spatial statistical techniques to explain a specific spatial pattern.

I. Concepts and Theories

Demography as a spatial science; difference between spatial demography and population geography; Spatial pattern and spatial process; location, distance and area; Distance and decay relationship and spatial hierarchy; space, place and region; Type of spaces- concrete and abstract space; absolute, relative and relational spaces.

Understanding demographic process by geographical scale; nature of disaggregated data- Census and secondary sources; Linking micro and macro demography in a spatial frame.

Application of spatial frameworks to demographic process; Space, culture and fertility; Spatial pattern of mortality and diseases; Distance as factor in access to health care and health planning; Migration and distance- gravity model; space, culture and migration; urban sprawl and sub-urbanization.

II. Statistical and Geospatial Data and Software

Spatial Concepts and Cartography: Spatial parameters: Site and location; Scale; Plane and spherical coordinate, Map Projection-UTM, Types of maps: cadastral, toposheet, thematic, digital; Representation of spatial and non-spatial data; **Introduction to geospatial software: GIS:** discrete data: point, and polygon data,

Raster and vector data, layouts preparation. Geocoding and basics of digitization in ArcGIS

Introduction to Geoda: ESDA in (Exploratory Spatial Data Analysis); Local Indicators of Spatial Association (LISA)

Statistical Concepts: Bar diagram, Frequency polygon, Frequency curve; Test of significance, confidence intervals, Univariate and Multivariate Statistics: Correlation and Regression, Matrix algebra; Auto-correlation; kriging, Moran's I index

Introduction to Statistical software: SPSS, STATA, R

III. GIS and Spatial Analysis of demographic data

Representation of statistical data and automated cartography (Lab based exercises):

- Population distribution map of India using dot and sphere/circle, cubes, combined; Cartograms
- Density map by Choropleth and population density gradient by Isopleth;
- Fertility, mortality and natural growth of population by Polygraph.

- d) Measurement of population concentration by cumulative curve.
- e) Migration flow by Carogram

Concept and application Models:

- a) Spatial Lag and Error Regression Modeling;
- b) Multilevel modeling (hierarchical linear modeling);
- c) Geographically Weighted Regression;
- d) Spatial Pattern Analysis;
- e) Urban and city level projection

I. Introduction to Bayesian Inference

- Bayesian and Classical Statistics
- Basic principles of Bayesian inference
- Certainty, uncertainty and probability
- Non-informative priors and conjugate priors, Prior and Posterior inference
- Hypothesis testing and credible intervals

II. Introduction to hierarchical models

- Bayesian linear regression model
- Hierarchical and empirical Bayesian models
- MCMC Simulation Methods-Markov chains, M-H algorithm, Gibbs sampling

III. Small Area Estimation

- Introduction to small area estimation
- Small area estimation using hierarchical models
- Synthetic and model-based estimation

IV. Advanced Topics in Bayesian Inference

- Bayesian model averaging
- Bayesian variable selection
- Bayesian nonparametric models

V. Applications of Bayesian and Small Area Estimation

- Bayesian inference for big data
- Machine learning techniques in Bayesian inference
- Bayesian inference for complex models

Readings:

2. Small Area Estimation by J.N.K. Rao and Isabel Molina

ANNEXURE-IV

Draft regulations for the award of PhD Degree, International Institute for Population Sciences, Mumbai, India, December 2023

S. No.	Content Item	As per UGC Regulations 2022
1.	Eligibility criteria for admission to the Ph.D. Programme	<p>The following are eligible for the PhD programme at IIPS</p> <p>(1) Candidates who have completed</p> <p>A 1-year/2-semester master's degree programme after a 4-year/8-semester bachelor's degree programme or a 2-year/4-semester master's degree programme after a 3-year bachelor's degree programme or qualifications declared equivalent to the master's degree by the corresponding statutory regulatory body, with at least 55% marks in aggregate or its equivalent grade in a point scale wherever grading system is followed</p> <p>or equivalent qualification from a foreign educational institution accredited by an assessment and accreditation agency which is approved, recognized or authorized by an authority, established or incorporated under a law in its home country or any other statutory authority in that country to assess, accredit or assure quality and standards of the educational institution.</p> <p>A relaxation of 5% marks or its equivalent grade may be allowed for those belonging to SC/ST/OBC (non-creamy layer)/Differently-Abled, Economically Weaker Section (EWS) and other categories of candidates as per the decision of the UGC from time to time.</p> <p>Provided that a candidate seeking admission after a 4-year/8-semester bachelor's degree programme should have a minimum of 75% marks in aggregate or its equivalent grade on a point scale wherever the grading system is followed. A relaxation of 5% marks or its equivalent grade may be allowed for those belonging to SC/ST/OBC (non-creamy layer)/Differently-Abled, Economically Weaker Section</p>

		<p>(EWS) and other categories of candidates as per the decision of the UGC from time to time.</p> <p>(2) Candidates who have completed the M.Phil. programme with at least 55% marks in aggregate or its equivalent grade in a point scale wherever grading system is followed or equivalent qualification from a foreign educational institution accredited by an assessment and accreditation agency which is approved, recognized or authorized by an authority, established or incorporated under a law in its home country or any other statutory authority in that country to assess, accredit or assure quality and standards of educational institutions, shall be eligible for admission to the Ph.D. programme.</p> <p>A relaxation of 5% marks or its equivalent grade may be allowed for those belonging to SC/ST/OBC (non-creamy layer)/Differently-Abled, Economically Weaker Section (EWS) and other categories of candidates as per the decision of the UGC from time to time.</p>
2.	Duration of the programme	<p>(1) Ph.D. Programme shall be for a minimum duration of three (3) years, including course work, and a maximum duration of six (6) years from the date of admission to the Ph.D. programme.</p> <p>(2) A maximum of an additional two (2) years can be given through a process of re-registration as per the Statute/Ordinance of the Institute; provided, however, that the total period for completion of a Ph.D. programme should not exceed eight (8) years from the date of admission in the Ph.D. programme.</p> <p>Provided further that, female Ph.D. scholars and Persons with Disabilities (having more than 40% disability) may be allowed an additional relaxation of two (2) years; however, the total period for completion of a Ph.D. programme in such</p>

		<p>cases should not exceed ten (10) years from the date of admission in the Ph.D. programme.</p> <p>(3) Female Ph.D. scholars may be provided Maternity Leave/Child Care Leave for up to 240 days in the entire duration of the Ph.D. programme.</p> <p>(4) A sick leave to a maximum of 90 days in the entire duration of the Ph.D. programme may be provided to PhD scholars subject to sufficient documentary evidence/medical certificate from a competent authority.</p> <p>Re-registration (academic extension without fellowship) guidelines:</p> <p>(1) PhD scholars, who are not able to complete their thesis within 6 years from the date of admission to the Ph.D. programme, will have to seek re-registration (academic extension without fellowship) for additional duration (maximum period of 2 years) preferably on or before the last date of regular duration. Female/differently-abled scholars will have to seek further extension, immediately after the lapse of first 2 years (maximum additional duration of 2 years).</p> <p>(2) If the PhD scholar did not request for re-registration within the stipulated time, his/her admission stands cancelled.</p> <p>(3) PhD scholar must submit his/her thesis within the stipulated time mentioned in the re-registration order by making an application and paying a re-registration fee of Rs 32,450 excluding other fees and clear all other dues/fees, if any, till the date of submission of final thesis.</p>
--	--	--

		(4) Duration of the fellowships shall be as per the duration prescribed by the sponsor of the fellowships.
3.	Procedure for admission	<p>(1) The admission shall be based on the criteria notified by the institute, keeping in view the guidelines/norms in this regard issued by the UGC and other statutory/regulatory bodies concerned, and taking into account the reservation policy of the Central/State Government from time to time.</p> <p>(2) Admission to the Ph.D. programme shall be made using the following methods:</p> <p>i. All candidates shall be admitted through an Entrance Test conducted by the Institute. The Entrance Test syllabus shall consist of 50% of research methodology, and 50% from Population Studies/Demography.</p> <p>ii. Candidates who have secured 50% marks in the entrance test are eligible to be called for the interview.</p> <p>iii. A relaxation of 5 % marks will be allowed in the entrance examination for the candidates belonging to SC/ST/OBC/differently-abled category/Economically Weaker Section (EWS), and other categories of candidates as per the decision of the UGC from time to time.</p> <p>iv. Institute may decide the number of eligible candidates to be called for an interview based on the number of Ph.D. seats available.</p> <p>v. Provided that for the selection of candidates based on the entrance test conducted by the Institute, a weightage of 70 % for the entrance test and 30 % for the performance in the interview shall be given.</p> <p>vi. The interview panel shall include an academic expert from outside the Institute.</p> <p>(3)</p> <p>i. The Institute shall notify a prospectus well in advance on the institution's website specifying the number of seats for admission, subject/discipline-wise distribution of available</p>

		<p>seats, criteria for admission, the procedure for admission, and all other relevant information for the candidates.</p> <p>ii. The Institute shall adhere to the National/State-level reservation policy, as applicable.</p> <p>(4) The Institute shall maintain a list of Ph.D. supervisors (specifying the name of the supervisor, his or her designation, and the department/school/centre), along with the details of Ph.D. scholars (specifying the name of the registered Ph.D. scholar, the topic of his/her research and the date of admission) admitted under them on the website of the institution and update this list every academic year.</p>
4.	Allocation of research supervisor	<p>Eligibility criteria to be a Research Supervisor, Co-Supervisor, Number of Ph.D. scholars permissible per supervisor, etc.</p> <p>(1) Permanent faculty members working as Professor/Associate Professor of the Institute with a Ph.D., and at least five research publications in peer-reviewed or refereed journals and permanent faculty members working as Assistant Professors in the Institute with a Ph.D., and at least three research publications in peer-reviewed or refereed journals may be recognized as a Research Supervisor in the Institute. Such recognized research supervisors cannot supervise research scholars in other institutions, where they can only act as co-supervisors.</p> <p>Adjunct Faculty members shall not act as Research Supervisors and can only act as co-supervisors.</p> <p>(2) In case of interdisciplinary/multidisciplinary research work, if required, a Co-Supervisor from outside the Institute may be appointed.</p>

		<p>(3) An eligible Professor/Associate Professor/Assistant Professor can guide up to eight (8)/ six (6)/ four (4) Ph.D. scholars, respectively, at any given time.</p> <p>(4) In case of relocation of a female Ph.D. scholar due to marriage or otherwise, the research data shall be allowed to be transferred to the Higher Educational Institution to which the scholar intends to relocate, provided all the other conditions in these Regulations are followed, and the research work does not pertain to a project sanctioned to the Institute/Supervisor by any funding agency. Such scholar shall, however, give due credit to the Institute and the supervisor for the part of research already undertaken.</p> <p>(5) Faculty members with less than three years of service before superannuation shall not be allowed to take new research scholars under their supervision. However, such faculty members can continue to supervise Ph.D. scholars who are already registered until superannuation and as a co-supervisor after superannuation, but not after attaining the age of 70 years.</p>
5.	Admission of international students in the PhD programme	<p>(1) Each supervisor can guide up to two international research scholars on a supernumerary basis over and above the permitted number of Ph.D. scholars as specified in clause 4.3 above.</p> <p>(2) The Institute may decide its own selection procedure for Ph.D. admission of international students keeping in view the guidelines/norms in this regard issued by statutory/regulatory bodies concerned from time to time.</p>
6.	Total number of PhD scholars under a supervisor/co-supervisor	At any point, the total number of Ph.D. scholars under a faculty member, either as a supervisor or a co-supervisor, shall not exceed the number prescribed in clause 4.3 and clause 5.1.
7.	Course work	Credit requirements, number, duration, syllabus, minimum standards for completion, etc.

	<p>(1) The Credit requirement for the Ph.D. coursework is a minimum of 20 credits, including a “Research and Publication Ethics” course as notified by UGC vide D.O. No. F.1- 1/2018(Journal/CARE) in 2019 and a research methodology course. The Research Advisory Committee can also recommend UGC recognized online courses as part of the credit requirements for the Ph.D. programme.</p> <p>(2) All Ph.D. scholars, irrespective of discipline, shall be required to train in teaching /education /pedagogy/writing related to their chosen Ph.D. subject during their doctoral period. Ph.D. scholars may also be assigned 4-6 hours per week of teaching/research assistantship for conducting tutorial or laboratory work and evaluations.</p> <p>(3) A Ph.D. scholar must obtain a minimum of 55% marks or B+ in the course work to be eligible to continue in the programme and submit his or her thesis.</p> <p>(4) Course work is mandatory and no course work exemption will be granted under any circumstances. All PhD scholars admitted from 2024 batch onwards will have to complete the course work in the first two semesters. Any scholar who fails to complete the course work with in first two semesters will have to leave the PhD programme.</p> <p>(5) Course work is also mandatory for PhD scholars with an M.Phil. degree.</p> <p>(5) Only regular and supplementary exams will be conducted for the students to clear the course work. There will not be any provision for improvement or special supplementary exams.</p> <p>(6) A PhD scholar must attend a minimum 75% of the total lectures during the coursework.</p>
--	---

		(7) The results and grade sheet will only show Pass/fail.
8.	Research advisory committee and its functions	<p>(1) There shall be a Research Advisory Committee as defined in the Statutes/Ordinances of the Institute concerned for each Ph.D. scholar. The Research Supervisor of the Ph.D. scholar concerned shall be the Convener of this committee, and this committee shall have the following responsibilities:</p> <ul style="list-style-type: none"> i. To review the research proposal and finalize the topic of research. ii. To guide the Ph.D. scholar in developing the study design and methodology of research and identify the course(s) that he/she may have to do. iii. To periodically review and assist in the progress of the research work of the PhD scholar. <p>(2) Each semester, a Ph.D. scholar shall appear before the Research Advisory Committee to make a presentation and submit a brief report on the progress of his/her work for evaluation and further guidance. The Research Advisory Committee shall submit its recommendations along with a copy of Ph.D. scholar's progress report to the Institute. A copy of such recommendations shall also be provided to the Ph.D. scholar.</p> <p>(3) In case the progress of the Ph.D. scholar is unsatisfactory, the Research Advisory Committee shall record the reasons for the same and suggest corrective measures. If the Ph.D. scholar fails to implement these corrective measures, the Research Advisory Committee may recommend, with specific reasons, the cancellation of the registration of the Ph.D. scholar from the Ph.D. programme.</p>
9.	Evaluation and Assessment Methods, minimum standards/credits for award of the degree	(1) Upon satisfactory completion of course work and obtaining the marks/grade prescribed in clause (3) of Regulation 7 above, the Ph.D. scholar shall be required to undertake research work and produce a draft dissertation/thesis.

		<p>(2) Before submitting the dissertation/thesis, the Ph.D. scholar shall make a presentation before the Research Advisory Committee, which shall also be open to all faculty members and other research scholars/students.</p> <p>(3) The Institute's library and information officer (LIO) shall check the draft PhD thesis with software applications for plagiarism in the research work. The research integrity shall be an integral part of all the research activities leading to the award of a Ph.D. degree at the Institute.</p> <p>(4) A Ph.D. scholar shall submit the thesis for evaluation, along with (a) an undertaking from the Ph.D. scholar that there is no plagiarism, (b) a certificate from the Institute's LIO and (c) a certificate from the Research Supervisor attesting to the originality of the thesis and that the thesis has not been submitted for the award of any other degree/diploma to any other Higher Educational Institution.</p> <p>(5) The Ph.D. thesis submitted by a Ph.D. scholar shall be evaluated by his/her Research Supervisor and at least two external examiners who are experts in the field and not in employment of the Institute. Such examiner(s) should be academics with a good record of scholarly publications in the field. Wherever possible, one of the external examiners should be chosen from outside India. The viva-voce board shall consist of the Research Supervisor and at least one of the two external examiners and may be conducted online. The viva-voce shall be open to the members of the Research Advisory Committee/faculty members/research scholars, and students. Institute may formulate appropriate rules/ordinances to effect the provisions of this Regulations.</p> <p>(6) A PhD scholar shall present two papers from his/her thesis in national/international conferences/seminars</p>
--	--	--

		<p>organized outside the Institute (presentations in Institute's organized conferences/seminars will not be considered) for being eligible for the viva-voce exam.</p> <p>(7) In addition to clause 9.6, a PhD scholar shall (a) publish one paper from his/her PhD thesis in reputed peer-reviewed national/international journals and (b) submit one paper from his/her PhD thesis for publication in reputed peer-reviewed national/international journals.</p> <p>(8) The viva-voce of the Ph.D. scholar to defend the thesis shall be conducted if both the external examiners recommend acceptance of the thesis after incorporating any corrections suggested by them. If one of the external examiners recommends rejection, the Institute shall send the thesis to an alternate external examiner from the approved panel of examiners, and the viva-voce examination shall be held only if the alternate examiner recommends acceptance of the thesis. If the alternate examiner does not recommend acceptance of the thesis, the thesis shall be rejected, and the Ph.D. scholar shall be declared ineligible for the award of a Ph.D.</p> <p>(9) The Institute concerned shall complete the entire process of evaluating a Ph. D. thesis, including the declaration of the viva-voce result, within a period of six (6) months from the date of submission of the thesis.</p>
10.	PhD through part-time mode	<p>(1) Ph.D. programmes through part-time mode will be permitted, provided all the conditions stipulated in these Regulations are fulfilled.</p> <p>(2) Candidates having a minimum of five (5) years of work experience post their highest academic degree shall be eligible to apply.</p>

		<p>(3) Course work is mandatory and no course work exemption will be granted under any circumstances.</p> <p>(4) The Institute shall obtain a “No Objection Certificate” through the candidate for a part-time Ph.D. programme from the appropriate authority in the organization where the candidate is employed, clearly stating that:</p> <ul style="list-style-type: none"> i. The candidate is permitted to pursue studies on a part-time basis. ii. His/her official duties permit him/her to devote sufficient time for research. iii. He/she will be relieved from the duty to complete the course work. <p>(5) The Institute shall not conduct Ph.D. programmes through distance and/or online mode.</p> <p>(6) Admission procedure for PhD through part-time mode will be same as described in section 3.</p>
11.	Issuing a provisional certificate	Prior to the actual award of the Ph.D. degree, the Institute shall issue a provisional certificate to the effect that the Ph.D. is being awarded in accordance with the provisions of these Regulations.
12.	Award of Ph.D. degrees prior to Notification of these Regulations	Award of degrees to candidates registered for the Ph.D. programme on or after July 11, 2009, till the date of Notification of these Regulations shall be governed by the provisions of the UGC (Minimum Standards and Procedure for Award of M.Phil./Ph.D. Degree) Regulations, 2009 or the UGC (Minimum Standards and Procedure for Award of M.Phil./Ph.D. Degrees) Regulations, 2016 as the case may be. Further, the award of degrees to candidates already registered and pursuing Ph.D. shall be governed by these Regulations or UGC (Minimum Standards and Procedure for Award of M.Phil./Ph.D. Degree) Regulations, 2016. Nothing in these Regulations shall impact the M.Phil. degree

		programmes commencing prior to the enactment of these Regulations.
13.	Depository with INFLIBNET	Following the successful completion of the evaluation process and before the announcement of the award of the Ph.D. degree(s), the Institute shall submit an electronic copy of the Ph.D. thesis to INFLIBNET, for hosting he same so as to make it accessible to all the Higher Educational Institutions and research institutions.

Referee's Evaluation Report on Ph.D. Thesis

**Name of the
Candidate:**

Title of Thesis :

**Name of Referee &
Address :**

SECTION A (Referee's Overall Recommendation)

	Recommendation of the Referee	Mark (✓) in the appropriate box
(a)	The thesis be accepted in present form.	
(b)	The thesis be accepted after clarification of the minor points listed in my report, at the time of viva-voce.	
(c)	The thesis be accepted after minor modifications in the thesis, as suggested in my report. The thesis need not be referred to an external referee again.	
(d)	The thesis requires major revisions. The nature of the revisions are indicated in my report. It is recommended that the revised thesis be examined again by an external referee.	
(e)	The thesis is rejected.	

Section B (Referee's Detailed Comments) : Please provide the following as an attachment.

1. General comments on the thesis, including a critical survey and evaluation of the quality and quantity of the work reported in thesis.
2. Points which require clarification, and suggested amendments or revisions (if any).
3. Questions to be asked at the time of the viva voce.

Proposed Fee Structure for Bachelor of Science in Population Science with Multiple Entry & Exit Points

Fees to be Paid at the Time of Admission	Amount (Rs.) to be paid at the time of Admission
1. Admission Fee (One Time)	550.00
2. Tuition Fee (per year)	8800.00
3. Computer Fee (per year)	2750.00
4. Examination Fee (per year)	1100.00
5. Provisional Certificate Fee (One Time)	110.00
6. Degree Certificate Fee (One Time)	220.00
7. Library Fee (per year)	880.00
8. Convocation Charges (One Time)	550.00
9. Medical Examination Fee (One Time)	220.00
10. Sport/Cultural Fee (per year)	1100.00
11. Thesis Submission Fee (One Time Only for 4 th Year)	550.00
Refundable Fee	
1. Library Deposit (One Time)	2200.00
2. Mess Deposit (One Time)	4400.00

In order to ensure flexible structures as per NEP, the Undergraduate degree programme is developed with multiple entry and exit points and re-entry options, with appropriate award certifications. Accordingly, the fee structure has been prepared and submitted for further approval.
