

POST DOCTORAL FELLOWSHIPS:

The University of Michigan

2020 Postdoctoral Fellowship

Position Description:

The Population Studies Center at the University of Michigan-Institute for Social Research expects to have up to three openings for Postdoctoral Fellowships beginning on or about September 1, 2020. Two fellowship openings will be sponsored by the National Institute on Aging (NIA), and up to one fellowship will be sponsored by the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD). NIA and NICHD are divisions of the U.S. National Institute of Health (NIH). As such, only U.S. Citizens and U.S. Permanent Residents are eligible for these fellowships, and applicants must be Citizens or Permanent Residents of the United States at the time of application.

Fellows devote most of their time to independent research, but may also take selected courses and/or teach on a light-load basis. Positions offer exceptional opportunity for collaboration with faculty of the Population Studies Center and Survey Research Center at the Institute for Social Research on major projects in the U.S. and overseas. Term of appointment will be for two years, contingent on continued funding. Stipend will be commensurate with experience, based on levels mandated by NIH. Fellowship offers are typically made in mid/late February.

Qualifications:

Applicants must have a Ph.D. in demography, public health, or one of the social sciences (e.g., sociology, economics, psychology) by the starting date.

Selection will be based on scholarly potential and compatibility with the interests of a faculty mentor. When considering applicants we will take into consideration current NIH guidelines with respect to the scope of population studies research supported by NIA, NICHD and the NIH priorities for Health Economics Research. More information about each agency and Health Economics Research priorities can be viewed at the URLs below:

<https://www.nia.nih.gov/about>

<https://www.nichd.nih.gov/about>

<https://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-025.html>

Application Instructions:

Applications are accepted through [Interfolio](#). The application window is November 1, 2019 - January 6, 2020. Screening of applications will continue until the position is filled, with full consideration being given to those applications that are complete as of January 6, 2020.

The following application materials are required:

- **Letter of application**
- **Curriculum Vitae** - which must include citizenship status on the first page
- **Statement of research interests** - A 1-2 page statement describing current research interests and activity, and a research plan for the postdoctoral fellowship period. Applicants wishing to be considered for support by NIA should describe their background in aging research, if any, and propose an aging-related research project that focuses on the health of the elderly or near-elderly population.
- **Examples of written work** - 2 minimum/3 (maximum) preferred
- **Letters of Recommendation** - Three letters of recommendation. Please use the Interfolio tools to send requests to your recommenders, or upload letters already saved to Interfolio. Letters are due by January 6, 2020. Applications are not considered complete until recommendation letters are received.

[APPLY NOW VIA INTERFOLIO](#)

Questions may be emailed to: pscpostdoctoralrecruitment@umich.edu

The Institute for Social Research at the University of Michigan seeks to recruit diverse postdoctoral fellows as a reflection of our commitment to serve the diverse people of Michigan, to maintain the excellence of the university, and to ground our research in varied disciplines, perspectives, and ways of knowing and learning. The University of Michigan is an Affirmative Action/Equal Opportunity Employer.

The University of Michigan is considered one of the foremost research universities in the United States, and is ranked the #1 Public Research University in the U.S by the National Science Foundation. Our academic programs rank in the top 5 public universities nationally. The University of Michigan has conducted the largest volume of research of any public university in the United States for eight consecutive years. In FY18, the volume of research at the University of Michigan totaled \$1.55 billion. The mission of the University of Michigan is to serve the people of Michigan and the world through preeminence in creating, communicating, preserving, and applying knowledge, art and academic values, and in developing leaders and citizens who will challenge the present and enrich the future.

Institute of Demography

The Higher School of Economics [Institute of Demography](#) in Russia in Moscow invites applications for postdoctoral research positions in the field of population studies (especially demographic analysis, economic demography and the influence of population changes on social economic development).

The job involves:

- working under the direct supervision of Associate Professors Mikhail Denisenko and Vladimir Kozlov
- giving the lectures and seminars for Master students devoted to Demography, Economic demography and Ageing
- participants are encouraged to pursue their own research in parallel with working on Institute of Demography research projects in several broad areas:
 - o influence of demographic changes on social economic development
 - o demographic issues

- writing research papers for international peer-reviewed journals in co-authorship with the members of the Institute
- participation in organization of the events and other contribution to the Institute's development

The Institute offers access to its databases, library and analytical software.

Requirements:

- a PhD from an international research university in such fields as: population studies, economics, statistics, sociology.
- a background in advanced methods of demographic analysis and statistics.
- software R and/or Stata
- ability to work in a team,
- fluent English
- the willingness to learn Russian or some skills in Russian are welcomed
- relevant experience in teaching is a required asset

General conditions for Post-Doctoral Research positions can be found [here](#). Appointments will be normally made for one year.

A CV and research statement should be submitted via [online application form](#) and **two letters of recommendation** should be submitted by the referees directly to fellowship@hse.ru by **February 15, 2019**. Please note that direct applications to the hiring Institute may not be reviewed.

About HSE

[HSE](#) is a young, dynamic, fast-growing Russian research university providing unique research opportunities.

Training Opportunities

New! The University of Wisconsin—Madison Institute on Aging announces the first MIDUS Gene Expression Workshop, June 9th – 10th, 2020 – This two-day workshop is designed to provide instruction to social and behavioral scientists interested in learning about functional genomics methods (e.g., gene expression profiling) in research on psychosocial determinants of health. Topics include general psychobiological concepts, research design and strategy, pragmatics of tissue sampling and sample processing, RNA profiling assays, low-level analysis of differential gene expression, and bioinformatic analyses of cellular and transcription factor mechanisms. The workshop includes interactive clinics in which attendees begin implementing these approaches in their own research programs. The larger conceptual focus is on environmental regulation of expression, with MIDUS RNA data as a primary example. [Apply now](#). Visit [this link](#) for more details.

RAND Postdoctoral Training Program in the Study of Aging

The RAND Postdoctoral Training Program in the Study of Aging enables outstanding junior scholars in demographic and aging research to sharpen their analytic skills, learn to communicate research results effectively, and advance their research agenda. The program blends formal and informal training and extensive collaboration with distinguished researchers in a variety of disciplines. Fellowships are for one year, renewable for a second. Each fellow receives a competitive annual stipend, travel stipend and health insurance. Applications for Fall 2020 are being accepted. [Read more](#).

NCHS Health Policy Fellow – National Center for Health Statistics (NCHS), Health Policy Fellow, Office of Planning, Budget, and Legislation. The National Center for Health Statistics (NCHS) is the nation's principal health statistics agency, providing data to identify and address health issues. NCHS compiles statistical information to help guide public health and health policy decisions. [Read the description](#).

Funding/Scholarship Opportunities

New! PEER Cycle 9 Call for Proposals Now Open

The United States Agency for International Development (USAID) has joined with several U.S. Government (USG) supported agencies to support Partnerships for Enhanced Engagement in Research (PEER). Administered by the U.S. National Academies of Sciences, Engineering, and Medicine (NASEM), PEER is a competitive grants program that invites scientists in developing countries, partnered with USG-supported collaborators, to apply for funds to support research and capacity-building activities on topics with strong potential development impacts. This innovative program is designed to leverage the investments other USG-supported

agencies have made in scientific research and training while supporting the initiatives of developing country scientists. [Learn more.](#)

Sandell Grants and Dissertation Fellowship Programs

Sandell Grants provide the opportunity for junior or non-tenured scholars to pursue research on retirement or disability policy. The program is open to scholars in all disciplines. Up to three grants of \$45,000 will be awarded for one-year projects. Proposal guidelines are [available online](#). Dissertation Fellowships support doctoral candidates studying retirement or disability policy. The program is open to scholars in all disciplines. Up to three fellowships of \$28,000 will be awarded. Proposal guidelines are [available online](#). The submission deadline for both programs is January 31, 2020.

Child Care Policy Research Partnership Grants

The Office of Planning, Research, and Evaluation (OPRE) in the Administration for Children and Families, U.S. Department of Health and Human Services has recently published a discretionary research funding announcements titled “Child Care Policy Research Partnership Grants.” If you have questions regarding this grant announcement, please email the OPRE grant review team at CCRP2@icfi.com or call 1-877-350-5913. The full announcement for “Child Care Policy Research Partnership Grants” is [available online](#).

Partnerships for Enhanced Engagement in Research (PEER)

The United States Agency for International Development (USAID) has joined with several U.S. Government (USG) supported agencies to support [Partnerships for Enhanced Engagement in Research \(PEER\)](#). Administered by the U.S. National Academies of Sciences, Engineering, and Medicine (NASEM), PEER is a competitive grants program that invites scientists in developing countries, partnered with USG-supported collaborators, to apply for funds to support research and capacity-building activities on topics with strong potential development impacts.

Call for Papers/Proposals

New! **Community, Work & Family** calls for submissions for a special issue honouring the expertise of two recently departed editors Laura den Dulk and Jennifer Swanberg. We invite theoretical or empirical papers centered around the expertise of the editors, i.e. papers that seek to understand what helps protect or improve the well-being of workers focusing on mechanisms or determinants at multiple levels. Examples include (but are not limited to) the levels of the worker, their family

and their community, the manager, the organisation, the private or public sector, and public policies / the national welfare state. Submissions that examine the interplay between multiple levels will be prioritised. A wide range of aspects of workers' wellbeing is welcomed across various national or international settings, including for instance health, work-family arrangements, work-life fit, and experiences of low-wage or precarious work. Deadline January 31. [Learn more.](#)

New! Russell Sage Foundation Journal of the Social Sciences Call for Articles

Issue on Low-Income Families in the 21st Century: Effective Public Policy Responses to Complexity and Change

The 21st century has seen major changes in both the nature of work and the nature of families in the United States, some building on trends over the past half century and some representing breaks from the past. Many observers hypothesize that U.S. public policies have failed to keep up with these changes—or have done so unevenly across localities, with particular consequences for low-income individuals and families. We seek paper proposals that provide research evidence on the changes in work and families, and the most promising policy options to meet contemporary needs. As such, this volume of RSF will inform efforts to develop, reform, and implement public policies and programs that effectively support low-income workers and their families. [Read the full call.](#)

Time Use Data for Health and Well Being

Cosponsored by Eunice Kennedy Shriver National Institute of Child Health & Human Development (NICHD), [Maryland Population Research Center](#) (MPRC), Minnesota Population Center, and Maryland Time Use Lab (MTUL). Time is one of the most valuable and contested resources in contemporary societies. Analyses of variation in daily time use patterns over time, space, and social groups is needed to advance understanding of determinants and consequences of time use for well-being. The 2020 UMD Time Use Conference will give members of the growing interdisciplinary time use research community the opportunity to interact with one another and share ideas. Researchers are invited to submit abstracts for papers that address any question related to the collection or analysis of time use data. Papers that address the 2020 conference theme, intersecting influences of macroeconomic conditions and micro-level factors on time use and well-being across the life course, are particularly encouraged. Deadline for submissions is January 31, 2020. [Read the full Call.](#)

EAPS Health, Morbidity and Mortality Working Group Workshop

Hosted by the Department of Sociology and the CICS.NOVA.UÉvora, Interdisciplinary Centre of Social Sciences at the University of Évora, Portugal, from the 21st to 23rd September, 2020. The theme of the workshop will be: "A broken promise: Advances and challenges in infant, child and young people's morbidity and

mortality". Please submit abstracts to Jon Anson (anson@bgu.ac.il) and Rosalina Pisco Costa (rosalina@uevora.pt) by Friday, 3rd April 2020. [Call for papers](#).

Jan. 10! Network on Life Course Health Dynamics and Disparities in 21st Century America (NLCHDD), funded by the National Institute on Aging, invites interested researchers to submit pilot proposals that have the potential to better understand how health and mortality outcomes across the adult life course are shaped by US state contexts. Proposals are due January 10, 2020. Investigators may request total (direct + indirect) costs in the range of \$10,000-\$20,000 for pilot projects, with a limit of 8% on indirect costs (IDC). Funds can be used for research assistance, salaries, travel, data acquisition, etc. Principal Investigators must hold a PhD. We expect to make 3-4 awards. For further information, please [visit the information page](#).

The **Journal of Housing Economics** is soliciting submissions for a [special issue on migration and housing markets](#). Deadline is January 15, submission portal will open in mid-October and early submissions will be considered promptly.

[Call for Applications](#)

New! Seminar & Workshop on Inequalities in Health, Longevity and Aging, 5-7 May 2020, Tel Aviv, Israel

The seminar and workshop are organized by the Interdisciplinary Centre on Population Dynamics at the University of Southern Denmark, in collaboration with the Department of Sociology and Anthropology and the Herczeg Institute on Aging at Tel Aviv University. We invite scholars of all academic ranks, including doctoral and postdoctoral researchers, to participate and present research on inequalities in health, longevity, and aging. The two-day international seminar will be held at Tel Aviv University on May 5-6, followed by a hands-on workshop on data visualization for demographic research using R on May 7. For additional information see <https://tinyurl.com/TAUSDU>

Science of Alzheimer's Disease and Related Dementias for Social Scientists Program

This unique program consists of a one-day series of lectures by national biomedical experts on ADRD. The purpose is to expose both junior and more advanced social scientists interested in pursuing research in the ADRD field to the biomedical foundations of the diseases, with the ultimate goal of expanding knowledge and facilitating interdisciplinary collaborations. The program is hosted by the University of Southern California Resource Center for Minority Aging Research (USC RCMAR) and USC Schaeffer Center for Health Policy & Economics Aging and Cognition Program. April 14, 2020. [Read more and apply](#).

27th Annual RAND Summer Institute

Two conferences addressing critical issues facing our aging population: Mini-

Medical School for Social Scientists; Workshop on the Demography, Economics, Psychology, and Epidemiology of Aging. Will be July 6-9, 2020, in Santa Monica, CA. Interested researchers can apply for financial support covering travel and accommodations. [**More information and application form.**](#)
