Learning Outcomes

The MA distance mode course in Population Studies reach out to a large number of government /non-government professionals involved in health, family planning and other population related programmes at various levels without dispensing from their duties. In addition, the programme is also devised to cater the training needs of students and professionals from various ESCAP/SAARC and other countries on population sciences. Professionals, trained demographers and population experts are the main outcomes of this Programme.

In short, on completion of two years Masters course, students shall be able to:

1. analyse, interpret and critically understand demographic, health and public health research
2. demonstrate an understanding of the essential principles of modern demographic methods and statistical softwares and how to apply them
3. employ basic computational skills used in the analysis of population, health and development
4. undertake original research projects that makes a contribution to the body of knowledge for human wellbeing
5. develop understanding in presentation skills and developing research papers
6. gain knowledge in research proposal development, sampling, modalities of conducting research
7. exhibit the ability to disseminate research findings to the scientific community and the general public
8. develop confidence in works related to public welfare
9. undertake jobs related to health and development
